

# Gastroenterology

Volume 163 / Number 2

August 2022

[www.gastrojournal.org](http://www.gastrojournal.org)

TABLE OF  
CONTENTS

## Contents

### ON THE COVER

**IBD Patients With Long-Term COVID-19 Symptoms: Persistence of SARS-CoV-2 RNA in Gut Mucosa.** See article by Zollner, et al, page 495, for additional information.

### COMMENTARIES

**341 Clinical Applications of Artificial Intelligence in Gastroenterology: Excitement and Evidence**  
*A. Ahuja and H. Kefalakes*

**345 Stopping Surveillance in Gastrointestinal Conditions: Thoughts on the Scope of the Problem and Potential Solutions**  
*A. H. Calderwood and D. J. Robertson*

**350 AGA Institute Quality Measure Development for Intragastic Balloons in the Management of Obesity**  
*G. Ketwaroo, C. Newberry, V. Kushnir, S. G. Sheth, and D. A. Leiman, on behalf of the Quality Committee of the American Gastroenterological Association*

**354 Strengths and Weaknesses of an Artificial Intelligence Polyp Detection Program as Assessed by a High-Detecting Endoscopist**  
*D. K. Rex, Y. Mori, P. Sharma, R. E. Lahr, K. C. Vemulapalli, and C. Hassan*

### DIVERSITY, EQUITY, AND INCLUSION IN GI

**359 A TEAM Approach to Diversity, Equity, and Inclusion in Gastroenterology and Hepatology**  
*R. Williams, P. M. White, and S. Balzora, Association of Black Gastroenterologists and Hepatologists Board of Directors*

### MENTORING, EDUCATION, AND TRAINING CORNER

**364 Integrating Cognitive Apprenticeship Into Gastroenterology Clinical Training**  
*K. A. Johnson-Laghi and M. C. Mattar*

Publisher: *Gastroenterology* (ISSN 0016-5085) is published monthly (semi-monthly in April) in two indexed volumes by Elsevier Inc, 230 Park Avenue, New York, NY 10169-0901, USA. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: Send address changes to Elsevier, Journal Returns, 1799 Highway 50 East, Linn, MO 65051, USA. 2022 US subscription rates: individual, \$739.00; student and resident, \$282.00. Outside of the U.S. and possessions: individual, \$968.00; student and resident, \$562.00; surface delivery, no additional charge; air mail delivery, add \$78.00. Prices subject to change without notice.

**EDITORIALS****368 Can We Predict the Onset of Celiac Disease?***B. Lebwohl and L. Greco*

See Meijer CR et al on page 426.

**369 The Influence of Place and Geography on Outcomes Across the Cancer Continuum***C. C. Murphy, E. D. Paskett, and S. L. Pruitt*

See Ma C et al on page 437.

**371 Arid1a: A Gatekeeper in the Development of Pancreatic Cancer From a Rare Precursor Lesion***M. Liu*

See Fukunaga Y et al on page 466.

**374  $\beta$ -Catenin Is a Novel Target in YES-associated Protein-driven Cholangiocarcinoma***A. Lozano and A. Lujambio*

See Zhang Y et al on page 481.

**376 Rear Window—What Can the Gut Tell Us About Long-COVID?***M. Leppkes and M. F. Neurath*

See Zollner A et al on page 495; and Miyakawa K et al on page 514.

**CLINICAL CHALLENGES AND IMAGES IN GI****379 A Distinct and Potentially Deadly Cause of Gastric Polyposis***J. AbiMansour, T.-T. Wu, and S. Sweetser***382 An Umbilical Mass in a Young Female***M.-S. Warraich, S. Fidai, and S. Gandhi***ELECTRONIC CLINICAL CHALLENGES AND IMAGES IN GI**For a full list, please see the table of contents online at [www.gastrojournal.org](http://www.gastrojournal.org).**PRACTICAL TEACHING CASE****384 A Rare Cause of Intussusception in an Adolescent Female**

CME

*A. Cardullo, T. J. Laborda, and J. F. Pohl***REVIEWS IN BASIC AND CLINICAL GASTROENTEROLOGY AND HEPATOLOGY****386 Pancreatic Cancer: Pathogenesis, Screening, Diagnosis, and Treatment**

WWW

*L. D. Wood, M. I. Canto, E. M. Jaffee, and D. M. Simeone***ORIGINAL RESEARCH****Full Reports****Esophagus****403 Opioid Exposure Differentially Impacts Esophageal Body Contraction Over the Lower Esophageal Sphincter**

CME

*D. A. Patel, J. Goss, M. Hayat, C. Tombazzi, R. D. Naik, J. C. Slaughter, M. Aslam, S. Sarker, T. Higginbotham, and M. F. Vaezi*

Chronic opioid use is associated with spastic disorders of the esophageal body, but not disorders of the esophagogastric junction.

## Stomach

- 411** **Toll-like Receptor 9 Pathway Mediates Schlafen<sup>+</sup>-MDSC Polarization During *Helicobacter*-induced Gastric Metaplasias**  
*L. Ding, J. Chakrabarti, S. Sheriff, Q. Li, H. N. Thi Hong, R. A. Sontz, Z. E. Mendoza, A. Schreibeis, M. A. Helmrath, Y. Zavros, and J. L. Merchant*

Some *Helicobacter pylori*-infected subjects have a genetic tendency to develop an aggressive immune response to bacterial and cellular debris that accumulates in the inflamed microenvironment, ultimately leading to pre-neoplastic sequelae.

## Celiac Disease

- 426** **Prediction Models for Celiac Disease Development in Children From High-Risk Families: Data From the PreventCD Cohort**  
*C. R. Meijer, R. Auricchio, H. Putter, G. Castillejo, P. Crespo, J. Gyimesi, C. Hartman, S. Kolacek, S. Koletzko, I. Korponay-Szabo, E. M. Ojinaga, I. Polanco, C. Ribes-Koninckx, R. Shamir, H. Szajewska, R. Troncone, V. Villanacci, K. Werkstetter, and M. L. Mearin*

See editorial on page 368.

Human Leukocyte Antigen-DQ2 homozygous girls have the highest risk to develop celiac disease. Personalized screening advice for celiac disease in children from high-risk families is possible using the Prediction application.

## GI Cancer

- 437** **Factors Associated With Geographic Disparities in Gastrointestinal Cancer Mortality in the United States**  
*C. Ma, S. E. Congly, D. E. Chyou, K. Ross-Driscoll, N. Forbes, E. S. Tsang, D. A. Sussman, and D. S. Goldberg*  
 See editorial on page 369.

The highest rates of death from gastrointestinal cancers occur in rural counties and in the Southeastern United States, with differences in county-level mortality from esophagus, stomach, pancreas, and colon cancer being associated with higher rates of smoking, diabetes, and obesity.

- 449** **NOTCH-YAP1/TEAD-DNMT1 Axis Drives Hepatocyte Reprogramming Into Intrahepatic Cholangiocarcinoma**  
*S. Hu, L. Molina, J. Tao, S. Liu, M. Hassan, S. Singh, M. Poddar, A. Bell, D. Sia, M. Oertel, R. Raeman, K. Nejak-Bowen, A. Singhi, J. Luo, S. P. Monga, and S. Ko*

We identify a subset of intrahepatic bile duct cancers that originate from hepatocytes instead of bile duct cells, and identify the epigenetic molecular basis of this fatal disease.

- 466** **Loss of Arid1a and Pten in Pancreatic Ductal Cells Induces Intraductal Tubulopapillary Neoplasm via the YAP/TAZ Pathway**  
*Y. Fukunaga, A. Fukuda, M. Omatsu, M. Namikawa, M. Sono, T. Masuda, O. Araki, M. Nagao, T. Yoshikawa, S. Ogawa, Y. Hiramatsu, Y. Muta, M. Tsuda, T. Maruno, Y. Nakanishi, J. Ferrer, T. Tsuruyama, T. Masui, E. Hatano, and H. Seno*

See editorial on page 371.

Simultaneous loss of *Arid1a* and *Pten* in pancreatic ductal cells induces development of intraductal tubulopapillary neoplasm and pancreatic ductal adenocarcinoma through activation of the YAP/TAZ pathway in mice. Pharmacological inhibition of the YAP/TAZ pathway suppresses formation of intraductal tubulopapillary neoplasm.

## 481 $\beta$ -Catenin Sustains and Is Required for YES-associated Protein Oncogenic Activity in Cholangiocarcinoma

Y. Zhang, H. Xu, G. Cui, B. Liang, X. Chen, S. Ko, S. Affo, X. Song, Y. Liao, J. Feng, P. Wang, H. Wang, M. Xu, J. Wang, G. M. Pes, S. Ribback, Y. Zeng, A. Singhi, R. F. Schwabe, S. P. Monga, M. Evert, L. Tang, D. F. Calvisi, and X. Chen

See editorial on page 374.

YES-associated protein drives cholangiocarcinogenesis via transcription enhanced associate domain-mediated transcriptional activation and functional crosstalk with  $\beta$ -Catenin.  $\beta$ -Catenin physically interacts with Yap in cholangiocarcinoma and is required for the oncogenic activity of YES-associated protein.

## Inflammatory Bowel Disease

### 495 Postacute COVID-19 is Characterized by Gut Viral Antigen Persistence in Inflammatory Bowel Diseases

A. Zollner, R. Koch, A. Jukic, A. Pfister, M. Meyer, A. Rössler, J. Kimpel, T. E. Adolph, and H. Tilg

See editorial on page 376.

Post-acute COVID-19 is a rapidly growing health-care challenge across the globe. This study identifies that postacute COVID-19 is accompanied by viral antigen persistence in the gut from patients with inflammatory bowel diseases.

## RESEARCH LETTERS

### 507 Accurate Nonendoscopic Detection of Esophageal Squamous Cell Carcinoma Using Methylated DNA Biomarkers

K. Ma, A. Kalra, H.-L. Tsai, S. Okello, Y. Cheng, and S. J. Meltzer, Esophageal Squamous Cell Carcinoma Consortium

### 510 A Chromosomal Duplication Encompassing Interleukin-33 Causes a Novel Hyper IgE Phenotype Characterized by Eosinophilic Esophagitis and Generalized Autoimmunity

A. K. Marwaha, R. Laxer, M. Liang, A. M. Muise, and T. Eiwegger, The Immune Dysregulation Group

### 514 Reduced Replication Efficacy of Severe Acute Respiratory Syndrome Coronavirus 2 Omicron Variant in "Mini-gut" Organoids

K. Miyakawa, M. Machida, T. Kawasaki, M. Nishi, H. Akutsu, and A. Ryo

See editorial on page 376.

### 517 Common Genetic Variants in the Bile Acid Synthesis Enzyme CYP7A1 Are Associated With Severe Primary Bile Acid Diarrhea

S. Balesaria, S. S. Pattni, I. M. Johnston, J. D. Nolan, R. N. Appleby, and J. R. F. Walters

## AGA SECTION

### 520 Reducing the Burden of Colorectal Cancer: AGA Position Statements

D. Lieberman, U. Ladabaum, J. V. Brill, F. P. May, L. S. Kim, C. Murphy, R. Wender, and K. Teixeira

## CONTINUING MEDICAL EDUCATION (CME)/MOC ACTIVITIES

### e17 CME Exam 1: A Rare Cause of Intussusception in an Adolescent Female

### e19 CME Exam 2: Opioid Exposure Differentially Impacts Esophageal Body Contraction Over the Lower Esophageal Sphincter

## GASTRO DIGEST

### 527 Prolonging Survival in Advanced Esophageal Squamous Cell Carcinoma With Immune Checkpoint Inhibitors

S. R. Markar

### 527 Mucus Sialylation Maintains the Peace in Intestinal Host Microbe Relations

D. Kotlarz
