Gastroenterology

COVERING THE COVER

2231 A. T. Chan and C. S. Williams

COMMENTARY

2234 Guidelines on Pancreatic Cystic Neoplasms: Major Inconsistencies With Available Evidence and Clinical Practice—Results From an International Survey
G. Marchegiani and R. Salvia, On behalf of the Verona EBM 2020 on IPMN

MENTORING, EDUCATION, AND TRAINING CORNER

2239 How to Manage the Large Nonpedunculated Colorectal Polyp
 N. Shahidi and M. J. Bourke

EDITORIALS

2244 The Evolution of Biologics Administration From Intravenous to Subcutaneous: Treatments for Inflammatory Bowel Disease Go Home
V. Solitano, L. Vuitton, L. Peyrin-Biroulet, and S. Danese
See Schreiber S et al on page 2340.

2247 Is IL-6 Back in *trans* Signaling for Inflammatory Bowel Disease?
L. W. Unger and A. Kaser

See Schreiber et al on page 2354.

2249 Expanding the Diagnostic Toolkit of Wilson Disease with ATP7B Peptides
V. Medici
See Collins CJ et al on page 2367.

Cover

Publisher: *Gastroenterology* (ISSN 0016-5085) is published monthly (semi monthly in January and May) in two indexed volumes by Elsevier Inc, 230 Park Avenue, New York, NY 10169-0901, USA. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: Send address changes to Elsevier, Journal Returns, 1799 Highway 50 East, Linn, MO 65051, USA. 2021 US subscription rates: individual, \$739.00; student and resident, \$282.00. Outside of the U.S. and possessions: individual, \$968.00; student and resident, \$562.00; surface delivery, no additional charge; air mail delivery, add \$78.00. Prices subject to change without notice.

- 2251 COVID-19 Gastrointestinal Symptoms and Attenuation of the Immune Response to SARS-CoV-2**
J. Miller and K. S. Yan
See Livanos AE et al on page 2435.

CLINICAL CHALLENGES AND IMAGES IN GI

- 2255 More Than Skin Deep: Beneath the Surface of a Routine Ampullary Adenoma**
S. A. Firkins, W. Chen, and S. G. Krishna

- 2258 An Uncommon Lesion of the Liver**
P. Su, J. Hong, and T. Li

- 2261 An Atypical Case of Acute Upper Gastrointestinal Bleeding**
A. Koutsoumourakis, M. Stafylidou, and A. Gagalis

ELECTRONIC CLINICAL CHALLENGES AND IMAGES IN GI

For a full list, please see the table of contents online at www.gastrojournal.org.

PRACTICAL TEACHING CASE

- 2264 Acute Neurological Symptoms After a Liver Transplant**
 *R. Ramkissoon, J. Yung-Lun Chin, and L. Jophlin*

REVIEWS AND PERSPECTIVES

Reviews in Basic and Clinical Gastroenterology and Hepatology

- 2267 Epigenetic Regulation of Intestinal Stem Cells and Disease: A Balancing Act of DNA and Histone Methylation**
A. Lorzadeh, M. Romero-Wolf, A. Goel, and U. Jadhav

ORIGINAL RESEARCH

Full Reports

Clinical—Alimentary Tract

- 2283 Mortality, Reoperation, and Hospital Stay Within 90 Days of Primary and Secondary Antireflux Surgery in a Population-Based Multinational Study**
 
M. Yanes, G. Santoni, J. Maret-Ouda, S. Markar, E. Ness-Jensen, J. Kauppila, M. Färkkilä, E. Lynge, E. Pukkala, L. Tryggvadóttir, M. von Euler-Chelpin, and J. Lagergren

Primary and secondary anti-reflux surgery has a favorable safety profile, particularly if performed on young and fit patients without severe comorbidity, and at high-volume centers.

- 2291 An International Consensus to Standardize Integration of Histopathology in Ulcerative Colitis Clinical Trials**

C. Ma, R. Sedano, A. Almradi, N. V. Castelee, C. E. Parker, L. Guizzetti, D. F. Schaeffer, R. H. Riddell, R. K. Pai, R. Battat, B. E. Sands, C. Rosty, M. C. Dubinsky, F. Rieder, N. Harpaz, M. T. Abreu, R. V. Bryant, G. Y. Lauwers, R. Kirsch, M. A. Valasek, E. Crowley, W. J. Sandborn, B. G. Feagan, R. K. Pai, and V. Jairath

An interdisciplinary expert panel created a standardized framework for collecting biopsies, interpreting histologic disease activity, and defining histologic response and remission for UC clinical trials.

2303 Development and Validation of a Novel Computed-Tomography Enterography Radiomic Approach for Characterization of Intestinal Fibrosis in Crohn's Disease

X. Li, D. Liang, J. Meng, J. Zhou, Z. Chen, S. Huang, B. Lu, Y. Qiu, M. E. Baker, Z. Ye, Q. Cao, M. Wang, C. Yuan, Z. Chen, S. Feng, Y. Zhang, M. Iacucci, S. Ghosh, F. Rieder, C. Sun, M. Chen, Z. Li, R. Mao, B. Huang, and S.-T. Feng

Our imaging model allows for accurate characterization of intestinal fibrosis in Crohn's disease. Importantly, the model was robust across different treatment centers and was not affected by coexisting inflammation.

2317 Endoscopic Submucosal Dissection in North America: A Large Prospective Multicenter Study

P. V. Draganov, H. Aihara, M. S. Karasik, S. Ngamruengphong, A. A. Aadam, M. O. Othman, N. Sharma, I. S. Grimm, A. Rostom, B. J. Elmunzer, S. A. Jawaid, D. Westerveld, Y. B. Perbtani, B. J. Hoffman, A. Schlachterman, A. Siegel, R. M. Coman, A. Y. Wang, and D. Yang

In this large North American study, we demonstrate that ESD was effective, safe and associated with low recurrence for the treatment of selected pre- and early cancerous lesions throughout the gastrointestinal tract.

2328 Fecal Mycobiota Combined With Host Immune Factors Distinguish *Clostridioides difficile* Infection From Asymptomatic Carriage

Y. Cao, L. Wang, S. Ke, J. A. Villafuerte Gálvez, N. R. Pollock, C. Barrett, R. Sprague, K. Daugherty, H. Xu, Q. Lin, J. Yao, Y. Chen, C. P. Kelly, Y.-Y. Liu, and X. Chen

Incorporating both gut mycobiota and host immune factors into classification models can better distinguish CDI from carrier state.

2340 Randomized Controlled Trial: Subcutaneous vs Intravenous Infliximab CT-P13 Maintenance in Inflammatory Bowel Disease

S. Schreiber, S. Ben-Horin, J. Leszczyszyn, R. Dudkowiak, A. Lahat, B. Gawdis-Wojnarska, A. Pukitis, M. Horynski, K. Farkas, J. Kierkus, M. Kowalski, S. J. Lee, S. H. Kim, J. H. Suh, M. R. Kim, S. G. Lee, B. D. Ye, and W. Reinisch

See editorial on page 2244.

The subcutaneous infliximab CT-P13 SC had non-inferior pharmacokinetics, and broadly comparable efficacy and safety profiles, to intravenous CT-P13 in patients with active Crohn's disease and ulcerative colitis.

2354 Therapeutic Interleukin-6 Trans-signaling Inhibition by Olamkicept (sgp130Fc) in Patients With Active Inflammatory Bowel Disease

S. Schreiber, K. Aden, J. P. Bernardes, C. Conrad, F. Tran, H. Höper, V. Volk, N. Mishra, J. I. Blase, S. Nikolaus, J. Bethge, T. Kühbacher, C. Röcken, M. Chen, I. Cottingham, N. Petri, B. B. Rasmussen, J. Lokau, L. Lenk, C. Garbers, F. Feuerhake, S. Rose-John, G. H. Waetzig, and P. Rosenstiel

See editorial on page 2247.

This study assessed the mechanism of action of olamkicept in patients with IBD and showed that clinical remission is associated with changes in mucosal pSTAT3 levels.

Clinical—Liver**2367 Direct Measurement of ATP7B Peptides Is Highly Effective in the Diagnosis of Wilson Disease**

C. J. Collins, F. Yi, R. Dayuha, P. Duong, S. Horslen, M. Camarata, A. K. Coskun, R. H. J. Houwen, T. L. Pop, H. Zoller, H.-w. Yoo, S. W. Jung, K. H. Weiss, M. L. Schilsky, P. Ferenci, and S. H. Hahn

See editorial on page 2249.

A proposed diagnostic score and algorithm incorporating ATP7B peptide concentrations in DBS can be rapidly diagnostic and supplemental to current Leipzig scoring systems.

Basic and Translational—Alimentary Tract**2383 Identification of an Anti-Integrin $\alpha v\beta 6$ Autoantibody in Patients With Ulcerative Colitis**

T. Kuwada, M. Shiokawa, Y. Kodama, S. Ota, N. Kakiuchi, Y. Nannya, H. Yamazaki, H. Yoshida, T. Nakamura, S. Matsumoto, Y. Muramoto, S. Yamamoto, Y. Honzawa, K. Kuriyama, K. Okamoto, T. Hirano, H. Okada, S. Marui, Y. Sogabe, T. Morita, T. Matsumori, A. Mima, Y. Nishikawa, T. Ueda, K. Matsumura, N. Uza, T. Chiba, and H. Seno

We found anti-integrin $\alpha v\beta 6$ antibodies in the sera of most patients with ulcerative colitis (UC) using ELISA. These antibody titers coincided with UC disease activity.

2395 Microbial Community Heterogeneity Within Colorectal Neoplasia and its Correlation With Colorectal Carcinogenesis*W. Liu, X. Zhang, H. Xu, S. Li, H. C.-H. Lau, Q. Chen, B. Zhang, L. Zhao, H. Chen, J. J.-Y. Sung, and J. Yu*

The microbial community within a single colorectal adenoma or tumour is heterogeneous, and correlated such heterogeneity with adenoma-carcinoma sequence and host genetic alteration.

2409 The Colonic Mucosal MicroRNAs, MicroRNA-219a-5p, and MicroRNA-338-3p Are Downregulated in Irritable Bowel Syndrome and Are Associated With Barrier Function and MAPK Signaling*S. Mahurkar-Joshi, C. R. Rankin, E. J. Videlock, A. Soroosh, A. Verma, A. Khandadash, D. Iliopoulos, C. Pothoulakis, E. A. Mayer, and L. Chang*

Irritable bowel syndrome (IBS) is associated with decreased expression of two microRNAs, miR-219a-5p and miR-338-3p, in the colonic mucosa, which may contribute to the impaired barrier function and increased pain sensitivity in IBS and could be important treatment targets.

2423 Gut Microbiota Perturbation in IgA Deficiency Is Influenced by IgA-Autoantibody Status*J. M. Moll, P. N. Myers, C. Zhang, C. Eriksen, J. Wolf, K. S. Appelberg, G. Lindberg, M. I. Bahl, H. Zhao, Q. Pan-Hammarström, K. Cai, H. Jia, S. Borte, H. B. Nielsen, K. Kristiansen, S. Brix, and L. Hammarström*

The gut microbiota of individuals with IgA deficiency, and in particularly those with IgA-specific autoreactive antibodies, is enriched for multiple factors associated with proinflammatory and disease-related processes.

2435 Intestinal Host Response to SARS-CoV-2 Infection and COVID-19 Outcomes in Patients With Gastrointestinal Symptoms*A. E. Livanos, D. Jha, F. Cossarini, A. S. Gonzalez-Reiche, M. Tokuyama, T. Aydillo, T. L. Parigi, M. S. Ladinsky, I. Ramos, K. Dunleavy, B. Lee, R. E. Dixon, S. T. Chen, G. Martinez-Delgado, S. Nagula, E. A. Bruce, H. M. Ko, B. S. Glicksberg, G. Nadkarni, E. Pujadas, J. Reidy, S. Naymagon, A. Grinspan, J. Ahmad, M. Tankelevich, Y. Bram, R. Gordon, K. Sharma, J. Houldsworth, G. J. Britton, A. Chen-Liaw, M. P. Spindler, T. Plitt, P. Wang, A. Cerutti, J. J. Faith, J.-F. Colombel, E. Kenigsberg, C. Argmann, M. Merad, S. Gnjatic, N. Harpaz, S. Danese, C. Cordon-Cardo, A. Rahman, R. E. Schwartz, N. A. Kumta, A. Aghemo, P. J. Bjorkman, F. Petralia, H. van Bakel, A. Garcia-Sastre, and S. Mehandru*

See editorial on page 2251.

Intestinal infection with SARS-CoV-2 is associated with a mild inflammatory response and improved clinical outcomes.

2451 Serotonin Deficiency Is Associated With Delayed Gastric Emptying*L. Wei, R. Singh, S. E. Ha, A. M. Martin, L. A. Jones, B. Jin, B. G. Jorgensen, H. Zogg, T. Chervo, A. Gottfried-Blackmore, L. Nguyen, A. Habtezion, N. J. Spencer, D. J. Keating, K. M. Sanders, and S. Ro*

The *Tph1CreERT2/+* mouse is a powerful tool to study the functional roles of EC cell-derived 5-HT. Deficiency of 5-HT leads to gastroparesis and slow-transit constipation, whereas the intraluminal provision of 5-HT reverses the impaired gut motility.

Basic and Translational—Liver**2467 Squalene Epoxidase Induces Nonalcoholic Steatohepatitis Via Binding to Carbonic Anhydrase III and is a Therapeutic Target***D. Liu, C. C. Wong, Y. Zhou, C. Li, H. Chen, F. Ji, M. Y. Y. Go, F. Wang, H. Su, H. Wei, Z. Cai, N. Wong, V. W. S. Wong, and J. Yu*

The authors identified that squalene epoxidase contributes to initiation and progression of NASH. Strategies to target this gene might be developed for NASH treatment.

Basic and Translational—Biliary**2483 X Chromosome Contribution to the Genetic Architecture of Primary Biliary Cholangitis**

R. Asselta, E. M. Paraboschi, A. Gerussi, H. J. Cordell, G. F. Mellis, R. N. Sandford, D. E. Jones, M. Nakamura, K. Ueno, Y. Hitomi, M. Kawashima, N. Nishida, K. Tokunaga, M. Nagasaki, A. Tanaka, R. Tang, Z. Li, Y. Shi, X. Liu, M. Xiong, G. Hirschfield, K. A. Siminovitch, Canadian-US PBC Consortium, Italian PBC Genetics Study Group, UK-PBC Consortium, Japan PBC-GWAS Consortium, M. Carbone, G. Cardamone, S. Duga, M. E. Gershwin, M. F. Seldin, and P. Invernizzi

Primary biliary cholangitis (PBC) is an autoimmune liver disease showing a strong female preponderance. Here, by performing the first PBC genetic study focused on chromosome X, we identified a novel locus characterized by the presence of a control element that may regulate several PBC and autoimmune-relevant genes.

CONTINUING MEDICAL EDUCATION (CME)/MOC ACTIVITIES**e16 CME Exam 1: Acute Neurological Symptoms After a Liver Transplant****e18 CME Exam 2: Mortality, Reoperation and Hospital Stay within 90 Days of Primary and Secondary Antireflux Surgery in a Population-based Multinational Study****e19 CME Exam 3: Development and Validation of a Novel Computed-Tomography Enterography Radiomic Approach for Characterization of Intestinal Fibrosis in Crohn's Disease****CLINICAL PRACTICE GUIDELINES****2496 AGA Clinical Practice Guidelines on the Medical Management of Moderate to Severe Luminal and Perianal Fistulizing Crohn's Disease**

J. D. Feuerstein, E. Y. Ho, E. Shmidt, H. Singh, Y. Falck-Ytter, S. Sultan, and J. P. Terdiman, on behalf of the American Gastroenterological Association Institute Clinical Guidelines Committee

2509 Medical Management of Adult Outpatients With Moderate to Severe Luminal Crohn's Disease: Clinical Decision Support Tool

American Gastroenterological Association
