ORIGINAL INVESTIGATION

39 Effect of High-Dose Trivalent vs Standard-Dose Quadrivalent Influenza Vaccine on Mortality or Cardiopulmonary Hospitalization in Patients With High-risk Cardiovascular Disease: A Randomized Clinical Trial

O Vardeny and Coauthors
for the INVESTED Committees and Investigators
This randomized clinical trial compares the effect of high-dose vs standard-dose influenza vaccine on all-cause mortality and hospitalizations due to cardiovascular or pulmonary causes in patients with high-risk cardiovascular disease.

Editorial 33

Visual Abstract

50 Effect of Capecitabine Maintenance Therapy Using Lower Dosage and Higher Frequency vs Observation on Disease-Free Survival Among Patients With Early-Stage Triple-Negative Breast Cancer Who Had Received Standard Treatment: The SYSUCC-001 Randomized Clinical Trial

X Wang and Coauthors
for the South China Breast Cancer Group (SCBCG)
This randomized trial compares the effects of low-dose high-frequency capecitabine maintenance therapy vs observation after standard adjuvant chemotherapy on 5-year disease-free survival among women with early-stage triple-negative breast cancer.

Editorial 36

Visual Abstract

59 Prevalence of Pulmonary Embolism Among Patients With COPD Hospitalized With Acutely Worsening Respiratory Symptoms

F Couturaud and Coauthors
for the PEP Investigators
This cross-sectional study characterizes the prevalence of pulmonary embolism defined by a uniform diagnostic algorithm in patients in France with COPD hospitalized with acutely worsening respiratory symptoms.
