## In The Limelight

### 1 In the Limelight: January 2021

Karl A. Nath 

## Editorials

### 4 Hold the Smartphone! Tele-epilepsy in a Post-COVID-19 World

Anteneh M. Feyissa

### 7 Fit Is It in COVID-19, Future Pandemics, and Overall Healthy Living

Carl J. Lavie, Fabian Sanchis-Gomar, and Ross Arena

### 10 Tissue Is the Issue: Kidney Biopsy Findings and Long-term Outcomes in Living Kidney Donors

Jessica van der Weijden and Martin H. de Borst

### 13 Stroke Prevention in Very Elderly Patients With Nonvalvular Atrial Fibrillation Revisited

Mohamad Alkhoul

### 16 Progressing From Print to Paperless Online Publishing

Karl A. Nath

## Medical Image

### 18 Inguinoscrotal Bladder Hernia Causing Hydroureteronephrosis and Acute Kidney Injury

June Tome, Newton Neidert, and Jason Szostek

## Commentary

### 20 COVID-19 and Medical Education: A Four-Part Model to Assess Risks, Benefits, and Institutional Obligations During a Global Pandemic

Paul Barach, Rami Ahmed, Eric S. Nadel, Frederic Hafferty, and Ingrid Philibert 

## Perspective and Controversy

### 29 Smartphones in Epilepsy: The New Age of Aquarius

William O. Tatum and Emily K. Acton 

## Original Articles

- 32 Inverse Relationship of Maximal Exercise Capacity to Hospitalization Secondary to Coronavirus Disease 2019**  
*Clinton A. Brawner, Jonathan K. Ehrman, Shane Bole, Dennis J. Kerrigan, Sachin S. Parikh, Bary K. Lewis, Ryan M. Gindi, Courtland Keteyian, Khaled Abdul-Nour, and Steven J. Keteyian*    
Maximal exercise capacity is independently and inversely associated with the likelihood of hospitalization due to COVID-19.
- 40 Kidney Microstructural Features at the Time of Donation Predict Long-term Risk of Chronic Kidney Disease in Living Kidney Donors**  
*Massini A. Merzkani, Aleksandar Denic, Ramya Narasimhan, Camden L. Lopez, Joseph J. Larson, Walter K. Kremers, Harini A. Chakkerla, Walter D. Park, Sandra J. Taler, Mark D. Stegall, Mariam P. Alexander, Naim Issa, and Andrew D. Rule*    
Low nephron number for age and larger glomeruli are important microstructural predictors for long-term risk of chronic kidney disease after living kidney donation.
- 52 Non-Vitamin K Antagonist Oral Anticoagulants in Elderly ( $\geq 85$  years) Patients With Newly Diagnosed Atrial Fibrillation: Changing Clinical Practice and Outcomes for Stroke Prevention in a Nationwide Cohort Study**  
*Wen-Han Cheng, Chem-En Chiang, Yenn-Jiang Lin, Shih-Lin Chang, Li-Wei Lo, Yu-Feng Hu, Ta-Chuan Tuan, Jo-Nan Liao, Fa-Po Chung, Tzeng-Ji Chen, Gregory Y.H. Lip, Shih-Ann Chen, and Tze-Fan Chao*   
A lower risk of ischemic stroke, mortality, and composite adverse events was observed, temporally associated with the increasing prescription rates of oral anticoagulants.
- 66 Association of Infant Antibiotic Exposure With Childhood Health Outcomes**  
*Zaira Aversa, Elizabeth J. Atkinson, Marissa J. Schafer, Regan N. Theiler, Walter A. Rocca, Martin J. Blaser, and Nathan K. LeBrasseur*    
Exposure to antibiotics in infancy is associated with distinct immunological, metabolic, and neurobehavioral health conditions, including asthma, allergic rhinitis, atopic dermatitis, celiac disease, overweight, obesity, ADHD, and learning disability.
- 78 Socioeconomic Disparities in Community Mobility Reduction and COVID-19 Growth**  
*Ashley Ossimetha, Angelina Ossimetha, Cyrus M. Kosar, and Momotazur Rahman*    
These findings are consistent with evidence demonstrating that economically disadvantaged communities have been disproportionately impacted by the coronavirus 2019 pandemic.
- 86 Paroxysmal Severe Mitral Regurgitation**  
*Thomas J. Breen, C. Charles Jain, Nicholas Y. Tan, William R. Miranda, and Rick A. Nishimura*   
Paroxysmal severe mitral regurgitation is a rare cause of heart failure in patients with preserved left ventricular function. Three distinct mechanisms can lead to this dynamic process, with treatments varying based on the underlying etiology.
- 92 County-Level Contextual Characteristics and Disparities in Life Expectancy**  
*Yan Xie, Benjamin Bowe, Yan Yan, Miao Cai, and Ziyad Al-Aly*   
Six county-level contextual factors including adult smoking, food insecurity, adult obesity, physical inactivity, college education, and median household income were associated with 3.53 years loss in life expectancy.
- 105 Physical Activity and Mortality Across Levels of Adiposity: A Prospective Cohort Study From the UK Biobank**  
*Miguel A. Sanchez-Lastra, Ding Ding, Knut-Eirik Dalene, Ulf Ekelund, and Jakob Tarpe*    
Low physical activity and adiposity were associated with a higher risk of premature mortality, but high physical activity attenuated the increased risk with adiposity irrespective of adiposity metric, except in people with a BMI  $\geq 35$  kg/m<sup>2</sup>.

- 120 Clinical Characteristics, Management Strategies and Outcomes of Acute Myocardial Infarction Patients With Prior Coronary Artery Bypass Grafting**  
Ahmad Shoaib, Mohamed Mohamed, Muhammad Rashid, Safi U. Khan, Purvi Parwani, Tahmeed Contractor, Hafsa Shaikh, Waqar Ahmed, Eoin Fahy, James Prior, David Fischman, Rodrigo Bagur, and Mamas A. Mamas   
Prior-CABG patients who received PCI had better in-hospital clinical outcomes compared with those who received medical management.

- 132 Prevalence of Colorectal Neoplasms Among Patients With *Enterococcus faecalis* Endocarditis in the GAMES Cohort (2008–2017)**  
Juan M. Pericàs, Juan Ambrosioni, Patricia Muñoz, Arístides de Alarcón, Martha Kestler, Amaia Mari-Hualde, Asunción Moreno, Miguel Á. Goenaga, M. Carmen Fariñas, Regino Rodríguez-Álvarez, Guillermo Ojeda-Burgos, Juan Gálvez-Acebal, Carmen Hidalgo-Tenorio, Mariam Nouredine, and José M. Miró, the GAMES Investigators   
This study adds to prior evidence suggesting a much higher rate of colorectal neoplasms among patients with *Enterococcus faecalis* infective endocarditis than in the general population of the same age and sex.

### Medical Image

- 147 Venous Hypertension (Sore Thumb Syndrome)**  
Yasushi Kakuchi

### Brief Reports

- 148 Effectiveness of Physical Distancing: Staying 6 Feet Over to Put Respiratory Viruses 6 Feet Under**  
Catherine M. Freeman, Matthew A. Rank, Catherine M. Bolster LaSalle, Thomas E. Grys, and John C. Lewis   
**152 Risk of SARS-CoV-2 Transmission Among Coworkers in a Surgical Environment**  
Mark A. Parkulo, Todd M. Brinker, Wendelyn Bosch, Arta Palaj, and Marie L. DeRuyter   
**156 Association of Timing and Balance of Physical Activity and Rest/Sleep With Risk of COVID-19: A UK Biobank Study**  
Alex V. Rowlands, David E. Kloecker, Yogini Chudasama, Melanie J. Davies, Nathan P. Dawkins, Charlotte L. Edwardson, Clare Gillies, Kamlesh Khunti, Cameron Razieh, Nazrul Islam, Francesco Zaccardi, and Tom Yates 

### Special Articles

- 165 Ethical Challenges in COVID-19 Biospecimen Research: Perspectives From Institutional Review Board Members and Bioethicists**  
Maria I. Lapid, Karen M. Meagher, Hannah C. Giunta, Bart L. Clarke, Yves Ouellette, Tamyra L. Armbrust, Richard R. Sharp, and R. Scott Wright   
**174 Analysis of the Changing Economics of US Hospital Transcatheter Aortic Valve Replacement Programs**  
Vinayak Kumar, Gurpreet S. Sandhu, Charles M. Harper, Henry H. Ting, and Charanjit S. Rihal
