Editorials

- 127 Reducing Risk of Dementia in AF—Is Oral Anticoagulation the Key?
Celine Gallagher, Dennis H. Lau, and Prashanthan Sanders
- 130 The Current Role of Bevacizumab in the Treatment of Hereditary Hemorrhagic Telangiectasia—Related Bleeding
James R. Gossage
- 133 Disease Progression and End-Stage Renal Disease in Diverse Glomerulopathies
Karl A. Nath and Fernando C. Fervenza
- 136 Aortic Root Dilatation in Patients With Leptosomic Features
Frank V. Brozovich

Commentary

- 138 Evidence, Not Evangelism, for Dietary Recommendations
James H. O'Keefe, James J. DiNicolantonio, Axel F. Sigurdsson, and Emilio Ros

Original Articles

- 145 Efficacy of Warfarin Anticoagulation and Incident Dementia in a Community-Based Cohort of Atrial Fibrillation
Malini Madhavan, Tiffany Y. Hu, Bernard J. Gersh, Veronique L. Roger, Jill Killian, Susan A. Weston, Jonathan Graff-Radford, Samuel J. Asirvatham, and Alanna M. Chamberlain                
- In a population-based cohort of patients with incident atrial fibrillation, anticoagulation with warfarin was associated with an approximately 20% lower risk of dementia.
- 155 Intravenous Bevacizumab for Refractory Hereditary Hemorrhagic Telangiectasia—Related Epistaxis and Gastrointestinal Bleeding
Vivek N. Iyer, Dinesh R. Apala, Bibek S. Pannu, Aditya Kotecha, Waleed Brinjikji, Michael D. Leise, Patrick S. Kamath, Sanjay Misra, Kebede H. Begna, Rodrigo Cartin-Ceba, Hilary M. DuBrock, Michael J. Krowka, Erin K. O'Brien, Rajiv K. Pruthi, Darrell R. Schroeder, and Karen L. Swanson 
- Intravenous bevacizumab is an effective treatment option for patients with hereditary hemorrhagic telangiectasia and severe anemia related to epistaxis and/or gastrointestinal bleeding.

Continued

- 167** End-Stage Renal Disease and Mortality Outcomes Across Different Glomerulonephropathies in a Large Diverse US Population
John J. Sim, Simran K. Bhandari, Michael Batech, Aviv Hever, Teresa N. Harrison, Yu-Hsiang Shu, Dean A. Kujubu, Tracy Y. Jonelis, Michael H. Kanter, and Steven J. Jacobsen 
- These findings revealed differences in estimated glomerular filtration rate decline and end-stage renal disease risk among patients with 5 glomerulonephropathies. This underscores the importance of individualizing treatment strategies.
- 179** Aortic Root Dilation: Do Patients With Marfan Syndrome Fare Worse Than Those With Marfanoid Features?
Meghana R.K. Helder, Hartzell V. Schaff, Thomas A. Foley, Nandan S. Anavekar, David R. Deyle, Alberto Pochettino, and Heidi M. Connolly 
- These authors recommend that patients with leptosomic features and aortic root dilation greater than 45 mm or a z score of 3 should be considered for surgical intervention.
- 184** Change in Submaximal Cardiorespiratory Fitness and All-Cause Mortality
Louise de Lannoy, Xuemei Sui, Carl J. Lavie, Steven N. Blair, and Robert Ross  
- A simple 5-minute submaximal test of cardiorespiratory fitness showed that maintaining or improving submaximal cardiorespiratory fitness over time is associated with a 40% lower risk of all-cause mortality.
- 191** The Diagnostic Accuracy of Fractional Exhaled Nitric Oxide Testing in Asthma: A Systematic Review and Meta-analyses
Zhen Wang, Paolo T. Pianosi, Karina A. Keogh, Feras Zaiem, Mouaz Alsawas, Fares Alahdab, Jehad Almasri, Khaled Mohammed, Laura Larrea-Mantilla, Wigdan Farah, Lubna Daraz, Patricia Barrionuevo, Allison S. Morrow, Larry J. Prokop, and Mohammad Hassan Murad  
- Fractional exhaled nitric oxide measurement has moderate accuracy to diagnose asthma in individuals aged 5 years and older.

Reviews

- 199** The Evolving Face of Myocardial Reperfusion in Acute Coronary Syndromes: A Primer for the Internist
R. Jay Widmer, Peter M. Pollak, Malcolm R. Bell, Bernard J. Gersh, and Nandan S. Anavekar  
- 217** The Role of Glucagon in the Pathophysiology and Treatment of Type 2 Diabetes
Sofie Hædersdal, Asger Lund, Filip K. Knop, and Tina Vilsbøll

Concise Review for Clinicians—CME Credit Offered

- 240** Proton Pump Inhibitors: Review of Emerging Concerns
Avinash K. Nehra, Jeffrey A. Alexander, Conor G. Loftus, and Vandana Nehra 

Please note that articles with an "e" page designation are available only in the online version of the Journal at www.mayoclinicproceedings.org

Residents' Clinic

- 247** 61-Year-Old Woman With Episodic Dysphagia and Chest Pain
Justin G. Brandler, Thomas G. Cotter, and Conor G. Loftus
- e13** 23-Year-Old Man With Jaundice and Elevated Liver Enzymes
Jacob Core and Fernando F. Stancampiano 

Symposium on Neurosciences—CME Credit Offered

- 252** Diagnosis and Management of Headache in Older Adults
Amaal J. Starling 

Letters to the Editor

- 263** Diaphragmatic Pacemaker for Perry Syndrome
Takuya Konno and Zbigniew K. Wszolek
- 263** In Reply—Diaphragmatic Pacemaker for Perry Syndrome
Erika K. Ross
- 263** Relationship Between Obesity and Survival in Patients Hospitalized for Hypertensive Emergency
Manyoo A. Agarwal, Mahek Shah, Lohit Garg, and Carl J. Lavie

Medical Images

- 266** A Stony Gland!
Satvinder Singh Bakshi

Path to Patient Image Quiz

- 267** Mucinous Neoplasm of the Appendix and Pseudomyxoma Peritonei
Lori A. Erickson and Michael Rivera

Art at Mayo Clinic

- e19** *Water Lily, Black-eyed Susan, Fern* by Yulia Hanansen
Margaret R. Wentz

Cover Image

The composite cover image highlights 3 salient themes: the wide-ranging effects of human biomedical research and discovery in driving progress in understanding and treating human disease (symbolized, on the left, by a neuron and its ramifying dendrites and axons); state-of-the-art investigation in evaluating human disease (symbolized, in the middle, by a positron emission tomographic image of the brain); and the indispensability of teamwork and the coalescence of expertise in providing the best possible care for patients (symbolized, on the right, by a collaborating surgical/interventional team).

Icon Key

-  This article has been given "Editor's Choice" distinction.
-  An author interview accompanies this article.
-  This article is online only at www.mayoclinicproceedings.org.
-  Supplemental material accompanies this article at www.mayoclinicproceedings.org.

"Mayo Clinic Proceedings," "Mayo," "Mayo Clinic," and the triple-shield Mayo Clinic logo are all registered marks of Mayo Foundation for Medical Education and Research.

MAYO CLINIC PROCEEDINGS (ISSN 0025-6196) is published monthly by Elsevier on behalf of Mayo Foundation for Medical Education and Research. Periodicals postage paid at New York, NY, and additional mailing offices. POST MASTER: Send address changes to Elsevier, Journal Returns, 1799 Highway 50 East, Linn, MO 65051, USA.
