## In The Limelight

### 1101 In the Limelight: May 2021

Karl A. Nath 

## Editorials

### 1105 Listening to Sounds of Gratitude

Richard D. Ten Hulzen 

### 1108 Opioid Overprescribing or Underprescribing After Surgery?

Mark D. Sullivan

### 1111 Premature Atrial Contractions: A Novel Link in the Heart–Brain Connection

Chaitra Janga and Malini Madhavan

### 1114 Stereotactic Radiosurgery: From a Prescribed Physical Radiation Dose Toward Biologically Effective Dose

Constantin Tuleasca, Maximilien Vermandel, and Nicolas Reyns

### 1117 Striving for Evidence-Based, Patient-Centered Guidance: The Impetus Behind the Society for Perioperative Assessment and Quality Improvement (SPAQI) Medication Management Consensus Statements

Avital Y. O'Glasser, Kurt J. Pfeifer, Angela F. Edwards, Jeanna D. Blitz, and Richard D. Urman

## Medical Image

### 1120 Oyster Shell-Like Skin Lesions in a Young Man

Jia-Wei Liu and Dong-Lai Ma 

## Commentary

### 1122 The Clinical Impact of Proteomics in Amyloid Typing

Michelle M. Hill, Surendra Dasari, Peter Mollee, Giampaolo Merlini, Catherine E. Costello, Bouke P.C. Hazenberg, Martha Grogan, Angela Dispenzieri, Morie A. Gertz, Taxiarchis Kourelis, and Ellen D. McPhail 

## Perspectives and Controversies

### 1128 A Blueprint to Control the SARS-CoV-2 Pandemic

John C. O'Horo, Amy W. Williams, and Andrew D. Badley 

### 1132 Silence in the Noise: Journey With Hearing Loss Across 2 Worlds

Taimur Sher 

## Original Articles

### 1135 Long-term Success With Diminished Opioid Prescribing After Implementation of Standardized Postoperative Opioid Prescribing Guidelines: An Interrupted Time Series Analysis

Bridget L. Findlay, Cameron J. Britton, Amy E. Glasgow, Matthew T. Gettman, Mark D. Tyson, Raymond W. Pak, Boyd R. Viers, Elizabeth B. Habermann, and Matthew J. Ziegelmann  

The authors identified a sustained 60% decrease in the average quantity of prescribed opioids at nearly 2 years after guideline implementation.

### 1147 Frequent Premature Atrial Contractions Are Associated With Poorer Cognitive Function in the Atherosclerosis Risk in Communities (ARIC) Study

Mary R. Rooney, Faye L. Norby, Ankit Maheshwari, Pamela L. Lutsey, Samuel C. Dudley Jr., Elsayed Z. Soliman, Laura R. Loehr, Thomas H. Mosley, Josef Coresh, Alvaro Alonso, and Lin Y. Chen  

These findings lend support to the notion that atrial cardiomyopathy may be a driver of atrial fibrillation-related outcomes.

### 1157 The Role of Biological Effective Dose in Predicting Obliteration After Stereotactic Radiosurgery of Cerebral Arteriovenous Malformations

Cody L. Nesvick, Christopher S. Graffeo, Paul D. Brown, Michael J. Link, Scott L. Stafford, Robert L. Foote, Nadia N. Laack, and Bruce E. Pollock 

Inclusion of a time component may be particularly relevant for large or complex arteriovenous malformations that require longer treatment times.

### 1165 Prevalence of SARS-CoV-2 Antibodies in a Multistate Academic Medical Center

Rickey E. Carter, Elitza S. Theel, Laura E. Breeher, Melanie D. Swift, Nathan A. Van Brunt, Windell R. Smith, Lorrie L. Blanchfield, Elizabeth A. Daugherty, Alyssa B. Chapital, Kathleen M. Matson, Katherine A. Bews, Patrick W. Johnson, Robert A. Dornick, Diane E. Joyce, Holly L. Geyer, Dane Granger, Heather R. Hilgart, Coleman T. Turgeon, Karen A. Sanders, Dietrich Matern, Aziza Nassar, Priya Sampathkumar, Caitlin M. Hainy, Robert R. Orford, Celine M. Vachon, Roshanak Didehban, William G. Morice, Henry H. Ting, Amy W. Williams, Richard J. Gray, Kent R. Thielen, and Gianrico Farrugia; on behalf of the Mayo Clinic Serology Screening Program Operations Team  

These results, which largely span the first 6 months of the pandemic, suggest that community prevalence influences the seroprevalence of health care workers despite personal protective equipment use in the workplace.

### 1175 Lower Extremity Arterial Disease as a Predictor of Incident Atrial Fibrillation and Cardiovascular Events

Andrew S. Tseng, Marlene Girardo, Christine Firth, Shubhang Bhatt, David Liedl, Paul Wennberg, Win-kuang Shen, Leslie T. Cooper, and Fadi E. Shamoun  

In high-risk patients with abnormal ankle-brachial index, particularly severe peripheral arterial disease, and cardiac structural abnormalities, routine monitoring for atrial fibrillation and management of cardiovascular risk factors may be warranted.

- 1184 Calf Vein Thrombosis Outcomes Comparing Anticoagulation and Serial Ultrasound Imaging Management Strategies**  
 Wiktoria Kuczmik, Waldemar E. Wysokinski, Thanila Macedo, David Froehling, Paul Daniels, Ana Casanegra, Damon Houghton, Danielle Vlazny, Ryan Meverden, Teresa Lang, Launia White, David Hodge, and Robert D. McBane II  
- For patients managed by serial surveillance imaging, the rate of venous thromboembolism recurrence composite was nearly 3-fold higher compared with patients who received anticoagulation treatment.
- 1193 Initiation of a Robotic Program in Spinal Surgery: Experience at a Three-Site Medical Center**  
 Mohamad Bydon, Selby G. Chen, Matthew D. Neal, Chandan Krishna, Aaron J. Biedermann, Travis C. Paul, Yagiz U. Yolcu, Anshrit Goyal, Bernard R. Bendok, Alfredo Quinones-Hinojosa, Robert J. Spinner, and Fredric B. Meyer 
- Initial experience from implementation of a robotic spine surgery program at a three-site enterprise medical center shows potential to achieve better intraoperative as well as postoperative outcomes.
- 1203 Cost-Effectiveness of Multitarget Stool DNA Testing vs Colonoscopy or Fecal Immunochemical Testing for Colorectal Cancer Screening in Alaska Native People**  
 Diana G. Redwood, Tuan A. Dinh, John B. Kiesel, Bijan J. Borah, James P. Moriarty, Ellen M. Provost, Frank D. Sacco, James J. Tiesinga, and David A. Ahlquist 
- Multitarget stool DNA testing may be a cost-effective addition to the screening options available to help reduce the disproportional burden of colorectal cancer in the Alaska Native population.
- 1218 Geographic Inequalities in Cardiovascular Mortality in the United States: 1999 to 2018**  
 Vibhu Parcha, Rajat Kalra, Ana F. Best, Nirav Patel, Sarabjeet S. Suri, Thomas J. Wang, Garima Arora, and Pankaj Arora 
- Addressing the disparities in social and environmental factors, such as income inequality, employment, educational opportunities, affordable housing, and discrimination, is crucial to stemming the disparities in cardiovascular health early in life.
- 1229 Predicting Delirium Risk Using an Automated Mayo Delirium Prediction Tool: Development and Validation of a Risk-Stratification Model**  
 Sandeep R. Pagali, Donna Miller, Karen Fischer, Darrell Schroeder, Norman Egger, Dennis M. Manning, Maria I. Lapid, Robert J. Pignolo, and M. Caroline Burton  
- The Mayo Delirium Prediction tool can be built into the electronic medical record, with a simplified risk-stratification score being delivered to the care provider.
- 1236 An International, Mixed-Methods Study of the Perceived Intrusiveness of Remote Digital Diabetes Monitoring**  
 Theodora Oikonomidi, Philippe Ravaud, Arthur James, Emmanuel Cosson, Victor Montori, and Viet-Thi Tran  
- Patients perceive remote digital monitoring as more intrusive when it includes occasional or regular food monitoring, real-time feedback by their regular physician or another care professional, and private-sector data handling.
