In The Limelight

1125 In the Limelight: July 2019

Karl A. Nath

Editorials

1128 Cardiovascular Safety of Febuxostat Versus Allopurinol in the Real World: Old Reliable Comes Out on Top

Rekha Mankad

1131 Isolated Aortic Regurgitation: A Tale of Two Disorders

Sushil Allen Luis, Ratnasari Padang, and Joseph G. Murphy

1135 Building Powerful Primary Care Teams

Thomas Bodenheimer

1138 Coronary Vasospasm Induced by Phentermine

Kyle B. Franke and Peter J. Psaltis

Medical Image

1141 Lymphatic Plastic Bronchitis Secondary to Thoracic Duct Stenosis

Hasan Ahmad Hasan Albitar and Robert Vassallo

Commentary

1143 Reducing the Burden of False-Positive Tests: It Is Time to Optimize Diagnostic Testing for Undifferentiated Conditions

Elliot B. Tapper, Luke Strnad, and Robert Shmerling

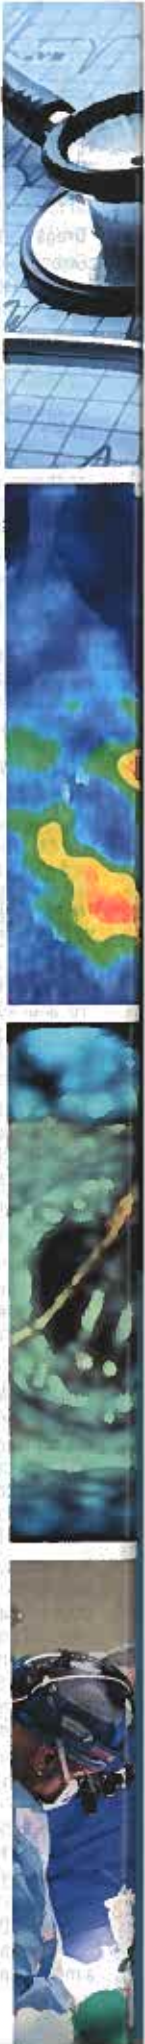

Original Articles

1147 Comparing Cardiovascular Safety of Febuxostat and Allopurinol in the Real World: A Population-Based Cohort Study

Ching-Yen Su, Li-Juan Shen, Song-Chou Hsieh, Lian-Yu Lin, and Fang-Ju Lin

The use of febuxostat, compared with allopurinol, was associated with a significantly increased risk of adverse cardiovascular events.

Continued

- 1158 Contemporary Etiologies, Mechanisms, and Surgical Approaches in Pure Native Aortic Regurgitation**
Li-Tan Yang, Hector I. Michelena, Joseph J. Maleszewski, Hartzell V. Schaff, and Patricia A. Pellikka 
 Bicuspid aortic valves accounted for 44% of surgical referrals for aortic regurgitation and, compared with tricuspid aortic valves, were more often associated with prolapse, root dilatation, and mixed mechanisms of aortic regurgitation.
- 1171 Association of Bezafibrate Treatment With Reduced Risk of Cancer in Patients With Coronary Artery Disease**
Zaza Iakobishvili, Tal Hasin, Robert Klempfner, Nir Shlomo, Ilan Goldenberg, Ronen Brenner, Ran Komowski, and Yariv Gerber  
 Bezafibrate treatment is associated with reduced risk of cancer among patients with coronary artery disease. Fibrinogen, but not lipid lowering, is linked to this association.
- 1180 Cognitive Frailty and Mortality in a National Cohort of Older Adults: the Role of Physical Activity**
Irene Esteban-Cornejo, Verónica Cabanas-Sánchez, Sara Higuera-Fresnillo, Francisco B. Ortega, Arthur F. Kramer, Fernando Rodríguez-Artalejo, and David Martínez-Gómez 
 Promoting a physically active lifestyle could be one of the main strategies against cognitive frailty related mortality.
- 1190 Comparison of Incident Cardiovascular Event Rates Between Generic and Brand L-Thyroxine for the Treatment of Hypothyroidism**
Robert C. Smallridge, Lindsey R. Sangaralingham, Raphael Mwangi, Fred Kusumoto, Holly Van Houten, and Victor Bernet
 There was no difference in frequency of atrial fibrillation, myocardial infarction, congestive heart failure, or stroke in patients taking generic versus brand levothyroxine.
- 1199 Characterization of the Obese Phenotype of Heart Failure With Preserved Ejection Fraction: A RELAX Trial Ancillary Study**
Yogesh N.V. Reddy, Gregory D. Lewis, Sanjiv J. Shah, Masaru Obokata, Omar F. Abou-Ezzedine, Marat Fudim, Jie-Lena Sun, Hrishikesh Chakraborty, Steven McNulty, Martin M. LeWinter, Douglas L. Mann, Lynne W. Stevenson, Margaret M. Redfield, and Barry A. Borlaug   
 Obese patients with heart failure with preserved ejection fraction have decreased quality of life, worse symptoms, and greater functional disability despite younger age and less impairment in conventional markers of heart failure severity.
- 1210 Use of Nitrates and Risk of Cardiovascular Events in Patients With Heart Failure With Preserved Ejection Fraction**
Tetsuro Tsujimoto and Hiroshi Kajio 
 Nitrate use in patients with heart failure with preserved ejection fraction was associated with a significantly increased risk of cardiovascular events.
- 1221 Prediction of Long-Term Incidence of Chronic Cardiovascular and Cardiopulmonary Diseases in Primary Care Patients for Population Health Monitoring: The Intermountain Chronic Disease Model (ICHRON)**
Heidi T. May, Donald L. Lappé, Kirk U. Knowlton, Joseph B. Muhlestein, Jeffrey L. Anderson, and Benjamin D. Home 
 The Intermountain Chronic Disease Risk Score is able to predict the overall incidence of multiple chronic diseases in a primary care population.
- 1231 Prospective Blinded Evaluation of Patient-Physician Agreement Using the Summary Outcome Determination (SOD) Score**
Anthony M. Vaichinger, Maegan N. Shields, Mark E. Morrey, and Shawn W. O'Driscoll  
 This score is used to obtain an overall perspective of a patient's response to treatment and has the potential to be a metric revealing the "value" of surgical interventions.

- 1242 Apixaban and Rivaroxaban in Patients With Acute Venous Thromboembolism**
Dalene M. Bott-Kitslaar, Robert D. McBane, Ana I. Casanegra, Damon E. Houghton, David A. Froehling, Danielle T. Vlazny, Aneel A. Ashrani, David O. Hodge, Emily R. Vargas, Matthew A. Bartlett, Rayya A. Saadiq, Paul R. Daniels, Raymond C. Shields, Charles J. Lenz, Teresa R. Lang, and Waldemar E. Wysokinski 
- Apixaban and rivaroxaban therapy was associated with a similar rate of venous thromboembolism recurrence and major bleeding.
- 1253 Micronutrient Deficiencies Are Common in Contemporary Celiac Disease Despite Lack of Overt Malabsorption Symptoms**
Adam C. Bledsoe, Katherine S. King, Joseph J. Larson, Melissa Snyder, Imad Absah, Rok Seon Choung, and Joseph A. Murray
- Micronutrient deficiencies remain common in adults with recently diagnosed celiac disease despite the low prevalence of weight loss and average overweight body mass index.
- 1261 Integrated Care Management of Patients With Atrial Fibrillation and Risk of Cardiovascular Events: The ABC (Atrial fibrillation Better Care) Pathway in the ATHERO-AF Study Cohort**
Daniele Pastori, Pasquale Pignatelli, Danilo Menichelli, Francesco Violi, and Gregory Y.H. Lip
- Management of patients according to the ABC pathway (A, Avoid stroke with anticoagulation; B, better symptom management; C, Cardiovascular and comorbidity risk management) resulted in fewer cardiovascular events.
- 1268 Clinical Presentation, Management, and Outcomes of Cardiovascular Implantable Electronic Device Infections Due to Gram-Negative Versus Gram-Positive Bacteria**
Zerelda Esquer Garrigos, Merit P. George, Prakhar Vijayvargiya, Eugene M. Tan, Saira Farid, Omar M. Abu Saleh, Paul A. Friedman, James M. Steckelberg, Daniel C. DeSimone, Walter R. Wilson, Larry M. Baddour, and M. Rizwan Sohail 
- Compared with cardiovascular implantable electronic device infections due to gram-positive bacteria, those caused by gram-negative bacteria are infrequent and usually present with localized pocket infection.
- 1278 Progress Toward Long-Term Survivors of Glioblastoma**
J. Nathan Cantrell, Mark R. Waddle, Maarten Rotman, Jennifer L. Peterson, Henry Ruiz-Garcia, Michael G. Heckman, Alfredo Quiñones-Hinojosa, Steven S. Rosenfeld, Paul D. Brown, and Daniel M. Trifiletti  
- This study identified several patient, treatment, and tumor characteristics that were able to predict improved odds of long-term survival and may be used to guide patient treatment selection.
- 1287 TNF-Alpha Inhibition and Other Immunosuppressants in the Development of Uveal and Cutaneous Melanoma**
Gena M. Damento, Jose S. Pulido, Barbara A. Abbott, David O. Hodge, and Lauren A. Dalvin 
- In patients receiving immunosuppressive treatments, physicians should consider monitoring with dilated ophthalmic and full-body skin examinations.

Medical Image

- 1296 Twiddler Syndrome: An Unusual Cause of Implantable Cardioverter-Defibrillator Failure**
Andre Briosas e Gala and Anthony Dimarco

Brief Report

- 1298 Development and Implementation of a Team-Based, Primary Care Delivery Model: Challenges and Opportunities**
Jay D. Mitchell, Jordan D. Haag, Eric Klavetter, Rachel Beldo, Nilay D. Shah, Lori J. Baumbach, Gerald J. Sobolik, Lila J. Rutten, and Robert J. Stroebel  

Review

1304 Clinical and Socioeconomic Predictors of Heart Failure Readmissions: A Review of Contemporary Literature

Amanda Su, Subhi J. Al'Aref, Ashley N. Beecy, James K. Min, and Maria G. Karas

Concise Review for Clinicians—CME Credit Offered

1321 Immune Checkpoint Inhibitor Toxicities

Julian A. Marin-Acevedo, Razvan M. Chirila, and Roxana S. Dronca 

Please note that articles with an “e” page designation are available only in the online version of the Journal at www.mayoclinicproceedings.org

Residents' Clinic

1330 58-Year-Old Asymptomatic Man With Left Ventricular Hypertrophy

Daniel R. Davies, Subir Bhatia, and Jeffrey B. Geske

1334 28-Year-Old Woman With Severe Generalized Abdominal Pain

Mehmet M. Tatari, Josiah D. McCain, and Jed C. Cowdell

e85 37-Year-Old Man With Fatigue and Erectile Dysfunction

Terin T. Sytsma and Rozalina G. McCoy 

Thematic Review on Women's Health—CME Credit Offered

1339 Influence of Sex on the Progression of Chronic Kidney Disease

Joel Neugarten and Ladan Golestaneh  

Thematic Review Series on Gastroenterological Diseases—CME Credit Offered

1357 Ulcerative Colitis

Joseph D. Feuerstein, Alan C. Moss, and Francis A. Farraye

Case Report

1374 Phentermine and Coronary Vasospasm—Induced Myocardial Infarction

Megha Prasad, Abdallah El Sabbagh, Charanjit Rihal, and Amir Lerman

Medical Image

1378 Pneumothorax in the Setting of Tuberous Sclerosis: A S“LAM” Dunk Diagnosis

Taiha Demirci and Kareem Ahmad

Letters to the Editor

1380 Improvement in Gastrointestinal Symptoms From Light Chain Amyloidosis After Adalimumab Therapy

Abdullah S. Al Saleh, M. Hasib Sidiqi, and Morie A. Gertz

1381 Identification of a Novel ZBTB20-JAK2 Fusion by Mate-Pair Sequencing in a Young Adult With B-Lymphoblastic Leukemia/Lymphoma

Jess F. Peterson, Patrick R. Blackburn, Matthew R. Webley, Kathryn E. Pearce, Cynthia M. Williamson, George Vasmatazis, James B. Smadbeck, Shannon L. Bieliauskas, Kaaren K. Reichard, Rhett P. Ketterling, Linda B. Baughn, and Patricia T. Greipp

1384 Chikungunya Virus Infection—Associated Psoriatic Arthritis?

Lin H. Chen and Shiv T. Sehra

1386 Practical Considerations in the Dangers Associated With Blood Transfusion: A Century Later

Renee E. Ziemer and James S. Newman

Path to Patient Image Quiz

1388 Multiple Hereditary Osteochondromas

Lori A. Erickson and Carrie Y. Inwards

Stamp Vignette On Medical Science

e91 Albert Schweitzer: Humanitarian With a “Reverence for Life”

Ahmadreza Afshar, David P. Steensma, and Robert A. Kyle

Art at Mayo Clinic

e93 500 Flowers by Roger Camp

Margaret R. Wentz
