

BRAIN

A JOURNAL OF NEUROLOGY

Volume 142 Part 11 November 2019

Editorial

- 3315 Editorial. *D. M. Kullmann*

Scientific Commentaries

- 3316 The first step towards personalized risk prediction for common epilepsies. *T. F. Hansen and R. S. Møller*
- 3318 High frequency oscillations in MEG: next steps in source imaging for focal epilepsy. *N. van Klink and M. Zijlmans*
- 3321 Intrastriatal injection of alpha-synuclein fibrils induces Parkinson-like pathology in macaques. *B. Dehay and E. Bezard*
- 3323 Overactivity of neuronal adenosine A_{2A} receptors accelerates neurodegeneration. *R. A. Cunha*

Updates

- 3325 Targeting the complement system in bacterial meningitis. *D. L. H. Koelman, M. C. Brouwer and D. van de Beek*
- 3338 Fluctuating cognition in the Lewy body dementias. *S. O'Dowd, J. Schumacher, D. J. Burn, et al.*

Reports

- 3351 *De novo* variants in *PAK1* lead to intellectual disability with macrocephaly and seizures. *S. Horn, M. Au, L. Basel-Salmon, et al.*
- 3360 TTTCA repeat insertions in an intron of *YEATS2* in benign adult familial myoclonic epilepsy type 4. *P. Yeetong, M. Pongpanich, C. Srichomthong, et al.*
- 3367 A novel lethal recognizable polymicrogyric syndrome caused by *ATPIA2* homozygous truncating variants. *N. Chatron, S. Cabet, E. Alix, et al.*
- 3375 Genetic and epigenetic study of an Alzheimer's disease family with monozygotic triplets. *M. Zhang, A. A. Dillio, R. Khallaf, et al.*

Original Articles

- 3382 Mutations in *PCYT2* disrupt etherlipid biosynthesis and cause a complex hereditary spastic paraplegia. *F. M. Vaz, J. H. McDermott, M. Alders, et al.*
- 3398 Glycine receptor autoantibodies disrupt inhibitory neurotransmission. *S. J. Crisp, C. L. Dixon, L. Jacobson, et al.*
- 3411 Human $CCR5^{high}$ effector memory cells perform CNS parenchymal immune surveillance via GZMK-mediated transendothelial diapedesis. *S. Herich, T. Schneider-Hohendorf, A. Rohlmann, et al.*
- 3428 Dynamic modular-level alterations of structural-functional coupling in clinically isolated syndrome. *I. Koubiyr, P. Besson, M. Deloire, et al.*
- 3440 A quantitative neuropathological assessment of translocator protein expression in multiple sclerosis. *E. Nutma, J. A. Stephenson, R. P. Gorter, et al.*
- 3456 Induction of immunological tolerance to myelinogenic glial-restricted progenitor allografts. *S. Li, B. C. Oh, C. Chu, et al.*
- 3473 Polygenic burden in focal and generalized epilepsies. *C. Leu, R. Stevelink, A. W. Smith, et al.*
- 3482 Excitatory GABAergic signalling is associated with benzodiazepine resistance in status epilepticus. *R. J. Burman, J. S. Selfe, J. H. Lee, et al.*
- 3502 Interictal epileptiform discharges shape large-scale intercortical communication. *P. Dahal, N. Ghani, A. Flinker, et al.*
- 3514 Magnetoencephalography imaging of high frequency oscillations strengthens presurgical localization and outcome prediction. *J. Velmurugan, S. S. Nagarajan, N. Mariyappa, et al.*
- 3530 Abstract goal representation in visual search by neurons in the human pre-supplementary motor area. *S. Wang, A. N. Mamelak, R. Adolphs, et al.*
- 3550 Traumatic microbleeds suggest vascular injury and predict disability in traumatic brain injury. *A. D. Griffin, L. C. Turtzo, G. Y. Parikh, et al.*
- 3565 Intrastriatal alpha-synuclein fibrils in monkeys: spreading, imaging and neuropathological changes. *Y. Chu, S. Muller, A. Tavares, et al.*

- 3580 Lower nucleus accumbens α -synuclein load and D3 receptor levels in Parkinson's disease with impulsive compulsive behaviours. *P. Barbosa, B. Hapuarachchi, A. Djamshidian, et al.*
- 3592 Non-motor outcomes depend on location of neurostimulation in Parkinson's disease. *J. N. Petry-Schmelzer, M. Krause, T. A. Dembek, et al.*
- 3605 Dopaminergic medication reduces striatal sensitivity to negative outcomes in Parkinson's disease. *B. McCoy, S. Jahfari, G. Engels, et al.*
- 3621 Antemortem volume loss mirrors TDP-43 staging in older adults with non-frontotemporal lobar degeneration. *A. Bejanin, M. E. Murray, P. Martin, et al.*
- 3636 Exacerbation of C1q dysregulation, synaptic loss and memory deficits in tau pathology linked to neuronal adenosine A_{2A} receptor. *K. Carvalho, E. Faivre, M. J. Pietrowski, et al.*

Dorsal Column

Book review

- 3655 Tales of the expected. *J. Warren*

Letters to the Editor

- e57 Thalamotomy for tremor normalizes aberrant pre-therapeutic visual cortex functional connectivity. *C. Tuleasca, T. Bolton, J. Régis, et al.*
- e58 Reply: Thalamotomy for tremor normalizes aberrant pre-therapeutic visual cortex functional connectivity. *J. C. DeSimone, D. B. Archer, D. E. Vaillancourt, et al.*
- e59 Treatment of anti-MDA5 autoantibody-positive juvenile dermatomyositis using tofacitinib. *S. Sabbagh, A. Almeida de Jesus, S. Hwang, et al.*
- e60 Reply: Treatment of anti-MDA5 autoantibody-positive juvenile dermatomyositis using tofacitinib. *O. Landon-Cardinal, O. Benveniste and Y. Allenbach*
- e61 Rs2293871 regulates *HTRA1* expression and affects cerebral small vessel stroke and Alzheimer's disease. *G. Liu, H. Zhang, B. Liu, et al.*
- e62 Corrigenda
- e64 Erratum

Evoked Response

- e65 Building brains: using brain organoids to study neural development and disease. *L. Lyon*
