

BRAIN

A JOURNAL OF NEUROLOGY

Cover image: The characters manifest envy and *Schadenfreude*, two opposite moral emotions rooted in self-other comparisons, as symbolized by the subject on the swing. In this issue, Santamaría *et al.* introduce a task indexing deservingness, moral, and legal dimensions of both emotions, evidencing a link between their exacerbation and atrophy of the social cognition network in frontotemporal dementia. From Santamaría *et al.* A lesion model of envy and *Schadenfreude*: legal, deservingness and moral dimensions as revealed by neurodegeneration. Pp. 3357–3377.

Illustration by Nathalia Gordillo.
