

BRAIN

A JOURNAL OF NEUROLOGY

Volume 142 Part 12 December 2019

Editorial

- 3661 Targeting network dysfunction in neurodegenerative diseases. *M. Husain*

Scientific Commentaries

- 3663 Graph theory for EEG: can we learn to trust another black box? *G. C. Smith and W. C. Stacey*
- 3666 The multifaceted nature of impulsivity in Parkinson's disease. *C. O'Callaghan*
- 3669 Towards a natural history of schizophrenia. *P. E. Vértes and J. Seidlitz*

Review Articles

- 3672 Chronic traumatic encephalopathy neuropathology might not be inexorably progressive or unique to repetitive neurotrauma. *G. L. Iverson, A. J. Gardner, S. R. Shultz, et al.*
- 3694 Informing disease modelling with brain-relevant functional genomic annotations. *R. H. Reynolds, J. Hardy, M. Ryten, et al.*

Original Articles

- 3713 β 2-Adrenergic receptor agonists ameliorate the adverse effect of long-term pyridostigmine on neuromuscular junction structure. *A. E. Vanhaesebrouck, R. Webster, S. Maxwell, et al.*
- 3728 Diagnostic criteria for small fibre neuropathy in clinical practice and research. *G. Devigili, S. Rinaldo, R. Lombardi, et al.*
- 3737 Overexpression of Sirtuin 1 protein in neurons prevents and reverses experimental diabetic neuropathy. *K. Chandrasekaran, M. Salimian, S. R. Konduru, et al.*
- 3753 RRM adjacent TARDBP mutations disrupt RNA binding and enhance TDP-43 proteinopathy. *H.-J. Chen, S. D. Topp, H. S. Hui, et al.*

- 3771 *C9orf72* expansion within astrocytes reduces metabolic flexibility in amyotrophic lateral sclerosis. *S. P. Allen, B. Hall, R. Woof, et al.*
- 3791 Action perception recruits the cerebellum and is impaired in patients with spinocerebellar ataxia. *A. R. Abdelgabar, J. Suttrup, R. Broersen, et al.*
- 3806 Decreased microglial Wnt/ β -catenin signalling drives microglial pro-inflammatory activation in the developing brain. *J. Van Steenwinkel, A.-L. Schang, M. L. Krishnan, et al.*
- 3834 Tumour-associated macrophage-derived interleukin-1 mediates glioblastoma-associated cerebral oedema. *C. J. Herting, Z. Chen, V. Maximov, et al.*
- 3852 A causal role for TRESK loss of function in migraine mechanisms. *P. Pettingill, G. A. Weir, T. Wei, et al.*
- 3868 Migraine with brainstem aura: defining the core syndrome. *N. Yamani, M. A. Chalmer and J. Olesen*
- 3876 Biallelic DMXL2 mutations impair autophagy and cause Ohtahara syndrome with progressive course. *A. Esposito, A. Falace, M. Wagner, et al.*
- 3892 Virtual resection predicts surgical outcome for drug-resistant epilepsy. *L. G. Kini, J. M. Bernabei, F. Mikhail, et al.*
- 3906 Hitting the brakes: pathological subthalamic nucleus activity in Parkinson's disease gait freezing. *M. J. Georgiades, J. M. Shine, M. Gilat, et al.*
- 3917 The structural connectivity of discrete networks underlies impulsivity and gambling in Parkinson's disease. *P. E. Mosley, S. Paliwal, K. Robinson, et al.*
- 3936 Hypersynchronization in mild cognitive impairment: the 'X' model. *S. Pusil, M. E. López, P. Cuesta, et al.*
- 3951 Neural structures supporting spontaneous and assisted (entrained) speech fluency. *L. Bonilha, A. E. Hillis, J. Wilmskoetter, et al.*

- 3963 Williams syndrome hemideletion and *LIMK1* variation both affect dorsal stream functional connectivity. *M. D. Gregory, C. B. Mervis, M. L. Elliott, et al.*

- 3975 Looking beyond the face area: lesion network mapping of prosopagnosia. *A. L. Cohen, L. Soussand, S. L. Corrow, et al.*

- 3991 Evolutionary modifications in human brain connectivity associated with schizophrenia. *M. P. van den Heuvel, L. H. Scholtens, S. C. de Lange, et al.*

Dorsal Column

Book Review

- 4003 Migraine: back in the brain and beyond ... *R. Allan Purdy*

Letters to the Editor

- e66 Adult-onset distal spinal muscular atrophy: a new phenotype associated with *KIF5A* mutations. *C. P. de Fuenmayor-Fernández de la Hoz, A. Hernández-Lain, M. Olivé, et al.*
- e67 Reply: Adult-onset distal spinal muscular atrophy: a new phenotype associated with *KIF5A* mutations. *D. Brenner, A. Rosenbohm, R. Yilmaz, et al.*
- e68 Dynamic functional connectivity changes in Lewy body disease. *J. Schumacher, A. J. Thomas and J.-P. Taylor*
- e69 Reply: Dynamic functional connectivity changes in Lewy body disease. *R. Biundo, E. Fiorenzato and A. Antonini*
- e70 ARSA variants in α -synucleinopathies. *M. B. Makarious, M. Diez-Fairen, L. Krohn, et al.*
- e71 Hypercalcaemia rather than high dose vitamin D₃ supplements could exacerbate multiple sclerosis. *J. Smolders, J. Damoiseaux and R. Hupperts*
- e72 Reply: Hypercalcaemia rather than high dose vitamin D₃ supplements could exacerbate multiple sclerosis. *D. Häusler, S. Torke, E. Peelen, et al.*
- e73 Corrigenda
