

# BRAIN

**Cover image:** Converging evidence for localization of tactile awareness from lesions (cyan) and regions exhibiting tonic responses to somatosensory stimulation in the healthy brain (orange). From Del Vecchio *et al.* Tonic somatosensory responses and deficits of tactile awareness converge in the parietal operculum. Pp.3779–3787. Illustration by Ezequiel Mikulan.

## Contents

### Editorial

**COVID and the brain**  
M. Husain  
3545

### Essay

**Aphasia localization: was Pierre Marie right?**  
L. Coutinho, P. Caramelli and H. A. Ghizoni Teive  
3547

### Scientific Commentaries

**Neuron, control thyself!**  
D. B. Rubin and A. C. Paulk  
3550

**Socioeconomic disadvantage in multiple sclerosis: does inequality act on the substrate for disability?**  
A. J. Green  
3552

**c-Abl phosphorylation primes PARIS for neurodegeneration**  
F. Giesert  
3555

**Somatosensory awareness in the parietal operculum**  
A. Sirigu and M. Desmurget  
3558
