

BRAIN

A JOURNAL OF NEUROLOGY

Volume 143 Part 3 March 2020

Editorial

- 715 Editorial. *D. M. Kullmann*

Scientific Commentaries

- 716 Proof-of-concept for a gene replacement approach to CDKL5 deficiency disorder. *T. A. Benke and P. C. Kind*
- 718 Towards metabolic disconnection – symptom mapping. *S. J. Forkel and M. Thiebaut de Schotten*
- 721 Rethinking the nature of inhibitory control deficits in Tourette syndrome. *G. M. Jackson and S. R. Jackson*
- 722 Virtual reality and real-time neurofeedback functional MRI: a breakthrough in foreseeing Alzheimer's disease? *F. Agosta, E. Canu and M. Filippi*

Review Articles

- 727 Evolving concepts on bradykinesia. *M. Bologna, G. Paparella, A. Fasano, M. Hallett, et al.*
- 751 Clinical and neuroimaging phenotypes of genetic parkinsonism from infancy to adolescence. *H. Morales-Briceño, S. S. Mohammad, B. Post, et al.*

Original Articles

- 771 Differential effect of lacosamide on Na_v1.7 variants from responsive and non-responsive patients with small fibre neuropathy. *J. I. R. Labau, M. Estacion, B. S. Tanaka, et al.*
- 783 *CYLD* is a causative gene for frontotemporal dementia – amyotrophic lateral sclerosis. *C. Dobson-Stone, M. Hallupp, H. Shahheydari, et al.*
- 800 Cortical interneuron-mediated inhibition delays the onset of amyotrophic lateral sclerosis. *C. S. Khademullah, A. J. Agrabawi, K. M. Place, et al.*

- 811 Gene replacement ameliorates deficits in mouse and human models of cyclin-dependent kinase-like 5 disorder. *Y. Gao, E. E. Irvine, I. Eleftheriadou, et al.*
- 833 Dynamics of recovery from anaesthesia-induced unconsciousness across primate neocortex. *S. R. Patel, J. J. Ballesteros, O. J. Ahmed, et al.*
- 844 Dynamics of language reorganization after left temporo-parietal and frontal stroke. *A. Stockert, M. Wawrzyniak, J. Klingbeil, et al.*
- 862 Dissociation between frontal and temporal-parietal contributions to connected speech in acute stroke. *J. Ding, R. C. Martin, A. C. Hamilton, et al.*
- 877 Metabolic lesion-deficit mapping of human cognition. *A. Jha, R. Teotonio, A.-L. Smith, et al.*
- 891 *In vivo* CRISPRa decreases seizures and rescues cognitive deficits in a rodent model of epilepsy. *G. Colasante, Y. Qiu, L. Massimino, et al.*
- 906 Impaired automatic but intact volitional inhibition in primary tic disorders. *V. Rawji, S. Modi, A. Latorre, et al.*
- 920 α -Synuclein oligomers in skin biopsy of idiopathic and monozygotic twin patients with Parkinson's disease. *S. Mazzetti, M. J. Basellini, V. Ferri, et al.*
- 932 Soluble TREM2 is elevated in Parkinson's disease subgroups with increased CSF tau. *E. N. Wilson, M. S. Swarovski, P. Linortner, et al.*
- 944 Network degeneration in Parkinson's disease: multimodal imaging of nigro-striato-cortical dysfunction. *M. C. Ruppert, A. Greuel, M. Tahmasian, et al.*
- 960 Long-term post-mortem studies following neurturin gene therapy in patients with advanced Parkinson's disease. *Y. Chu, R. T. Bartus, F. P. Manfredsson, et al.*
- 976 Earliest amyloid and tau deposition modulate the influence of limbic networks during closed-loop hippocampal downregulation. *S. Skouras, J. Torner, P. Andersson, et al.*

- 993 Basal forebrain volume reliably predicts the cortical spread of Alzheimer's degeneration. *S. Fernández-Cabello, M. Kronbichler, K. R. A. Van Dijk, et al.*
- 1010 Neuroinflammation and protein aggregation co-localize across the frontotemporal dementia spectrum. *W. R. Bevan-Jones, T. E. Cope, P. S. Jones, et al.*
- 1027 Two distinct neuroanatomical subtypes of schizophrenia revealed using machine learning. *G. B. Chand, D. B. Dwyer, G. Erus, et al.*

Dorsal Column

Grey Matter

- 1039 Adolf Meyer: the neuroanatomist and neuropsychiatrist behind Meyer's loop and its significance in neurosurgery. *O. E. M. G. Schijns and P. J. Koehler*

Letters to the Editor

- e17 Brain-behaviour associations and neural representations of emotions in frontotemporal dementia. *J. Van den Stock, F.-L. De Winter, L. Emsell, et al.*
- e18 Reply: Brain-behaviour associations and neural representations of emotions in frontotemporal dementia. *C. R. Marshall and J. D. Warren*
- e19 Early-onset genetic epilepsies reaching adult clinics. *D. Lewis-Smith, C. A. Ellis, I. Helbig, et al.*
- e20 Selected cryptic exons accumulate in hippocampal cell nuclei in Alzheimer's disease with and without associated TDP-43 proteinopathy. *P. Torres, P. Andrés-Benito, A. Fernández-Bernal, et al.*
- e21 Reply: Selected cryptic exons accumulate in hippocampal cell nuclei in Alzheimer's disease with and without associated TDP-43 proteinopathy. *P. T. Nelson*
- e22 Corrigenda
- e24 Erratum
