

BRAIN

A JOURNAL OF NEUROLOGY

Volume 143 Part 5 May 2020

Editorial

- 1285 Editorial. D. M. Kullmann

Scientific Commentaries

- 1286 The NLRP3 inflammasome in progressive multiple sclerosis. A. Kadowaki and F. J. Quintana
- 1288 Shaking with fear: the role of noradrenaline in modulating resting tremor. N. L. Taylor, E. J. Müller and J. M. Shine
- 1291 Neither white nor black: embracing clinical variability in dementia diagnosis. O. Piguet
- 1293 Elucidating neural network changes induced by deep brain stimulation for OCD. J. Kuhn and J. C. Baldermann

Review Articles

- 1297 Microglia and macrophage phenotypes in intracerebral haemorrhage injury: therapeutic opportunities. Q. Bai, M. Xue and V. W. Yong
- 1315 A multiomics approach to heterogeneity in Alzheimer's disease: focused review and roadmap. A. P. Badhwar, G. P. McFall, S. Sapkota, et al.

Update

- 1332 Disrupted glycosylation of lipids and proteins is a cause of neurodegeneration. T. Moll, P. J. Shaw and J. Cooper-Knock

Report

- 1341 Relationship between cortical iron and tau aggregation in Alzheimer's disease. N. Spotorno, J. Acosta-Cabronero, E. Stomrud, et al.

Original Articles

- 1350 *In vivo* stress granule misprocessing evidenced in a FUS knock-in ALS mouse model. X. Zhang, F. Wang, Y. Hu, et al.

- 1368 Corticospinal-motor neuronal plasticity promotes exercise-mediated recovery in humans with spinal cord injury. H. J. Jo and M. A. Perez
- 1383 Neural stem cells restore myelin in a demyelinating model of Pelizaeus-Merzbacher disease. F. I. Gruenenfelder, M. McLaughlin, I. R. Griffiths, et al.
- 1400 Early clinical markers of aggressive multiple sclerosis. C. B. Malpas, A. Manouchehrinia, S. Sharmin, et al.
- 1414 NLRP3 inflammasome as prognostic factor and therapeutic target in primary progressive multiple sclerosis patients. S. Malhotra, C. Costa, H. Eixarch, et al.
- 1431 Myelin oligodendrocyte glycoprotein antibody-associated disease: an immunopathological study. Y. Takai, T. Misu, K. Kaneko, et al.
- 1447 Bi-allelic GAD1 variants cause a neonatal onset syndromic developmental and epileptic encephalopathy. N. Chatron, F. Becker, H. Morsy, et al.
- 1462 Bidirectional gut-to-brain and brain-to-gut propagation of synucleinopathy in non-human primates. M.-L. Arotcarena, S. Dovero, A. Prigent, et al.
- 1476 Microglial exosomes facilitate α -synuclein transmission in Parkinson's disease. M. Guo, J. Wang, Y. Zhao, et al.
- 1498 Cognitive load amplifies Parkinson's tremor through excitatory network influences onto the thalamus. M. F. Dirks, H. Zach, A. J. van Nuland, et al.
- 1512 Isolation of infectious, non-fibrillar and oligomeric prions from a genetic prion disease. I. Vanni, L. Pirisinu, C. Acevedo-Morantes, et al.
- 1525 Acute ischaemic stroke alters the brain's preference for distinct dynamic connectivity states. A. K. Bonkhoff, F. A. Espinoza, H. Gazula, et al.
- 1541 A unified model of post-stroke language deficits including discourse production and their neural correlates. R. S. W. Alyahya, A. D. Halai, P. Conroy, et al.

- 1555 Redefining the multidimensional clinical phenotypes of frontotemporal lobar degeneration syndromes. A. G. Murley, I. Coyle-Gilchrist, M. A. Rouse, et al.
- 1572 Tau immunophenotypes in chronic traumatic encephalopathy recapitulate those of ageing and Alzheimer's disease. J. D. Arena, D. H. Smith, E. B. Lee, et al.
- 1588 Microglial activation and tau burden predict cognitive decline in Alzheimer's disease. M. Malpetti, R. A. Kievit, L. Passamonti, et al.
- 1603 Deep brain stimulation modulates directional limbic connectivity in obsessive-compulsive disorder. E. A. Fridgerisson, M. Figuee, J. Luigjes, et al.

Dorsal Column

Book Review

- 1613 Neurology and what? N. Scolding

Letters to the Editor

- e35 How to define migraine with brainstem aura? T. Lempert and B. M. Seemungal
- e36 Primary brain calcification due to a homozygous MYORG mutation causing isolated paroxysmal kinesigenic dyskinesia. G. Saranza, K. Grütz, C. Klein, et al.
- e37 Reply: Primary brain calcification due to a homozygous MYORG mutation causing isolated paroxysmal kinesigenic dyskinesia. G. Nicolas, L. Grangeon and D. Wallon
- e38 Inhibition between human brain areas or methodological artefact? C. Sperber and H.-O. Karnath
- e39 Reply: Inhibition between human brain areas or methodological artefact? M. N. Toba, C. Malherbe, O. Godefroy, et al.
- e40 The influence of sample size and arbitrary statistical thresholds in lesion-network mapping. C. Sperber and A. Dadashi
- e41 Reply: The influence of sample size and arbitrary statistical thresholds in lesion-network mapping. A. L. Cohen and M. D. Fox
- e42 Corrigenda
