

# European Heart Journal Supplements

Volume 21 No. Supplement A February 2019

<b>Introduction</b>	
<i>F. Zannad</i>	A1
<b>Potassium homoeostasis and pathophysiology of hyperkalaemia</b>	
<i>K. P. Kjeldsen and T. A. Schmidt</i>	A2
<b>Hyperkalaemia: aetiology, epidemiology, and clinical significance</b>	
<i>J. Tromp and P. van der Meer</i>	A6
<b>Current treatment and unmet needs of hyperkalaemia in the emergency department</b>	
<i>Z. Rafique, T. Chouihed, A. Mebazaa and W. Frank Peacock</i>	A12
<b>Barriers to guideline mandated renin-angiotensin inhibitor use: focus on hyperkalaemia</b>	
<i>S. Vijayakumar, J. Butler and G. L. Bakris</i>	A20
<b>Pharmacology of new treatments for hyperkalaemia: patiromer and sodium zirconium cyclosilicate</b>	
<i>G. M. C. Rosano, I. Spoletini and S. Agewall</i>	A28
<b>New frontiers for management of hyperkalaemia: the emergence of novel agents</b>	
<i>M. E. Nassif and M. Kosiborod</i>	A34
<b>New treatments for hyperkalaemia: clinical use in cardiology</b>	
<i>S. Vijayakumar, J. Butler and S. D. Anker</i>	A41
<b>A new area for the management of hyperkalaemia with potassium binders: clinical use in nephrology</b>	
<i>P. Rossignol</i>	A48
<b>Potassium binders for the prevention of hyperkalaemia in heart failure patients: implementation issues and future developments</b>	
<i>F. Zannad, J. P. Ferreira and B. Pitt</i>	A55
