

STATUS QUO 2020: what have we learned so far in temporary mechanical circulatory support? Use of Impella beyond the cathlab: open issues and clinical needs <i>F. Pappalardo and J. E. Møller</i>	A1
Cardioprotective shock management: monitoring and supportive therapies <i>D. Schibilsky, C. Delmas, L. Bonello and P. Hunziker</i>	A3
Managing vascular access and closure for percutaneous mechanical circulatory support <i>K. Karatolios, P. Hunziker and D. Schibilsky</i>	A10
Intensive care unit management of percutaneous mechanical circulatory supported patients: the role of imaging <i>A. Montisci, L. F. Bertoldi, S. Price, C. Hassager, J. Møller and F. Pappalardo</i>	A15
Pump flow setting and assessment of unloading in clinical practice <i>J. E. Møller, C. Hassager, L. Bonello, C. Delmas and F. Pappalardo</i>	A23
Left ventricular unloading and the role of ECPELLA <i>J. Belohlavek, P. Hunziker and D. W. Donker</i>	A27
Escalation and de-escalation of mechanical circulatory support in cardiogenic shock <i>L. F. Bertoldi, C. Delmas, P. Hunziker and F. Pappalardo</i>	A35
Weaning from Impella and mobilization of Impella patients <i>L. F. Bertoldi, A. Montisci, C. Delmas and F. Pappalardo</i>	A41
