

European Heart Journal Supplements

Volume 24 Supplement J December 2022

European best practice: a step forward to optimize Impella-protected percutaneous coronary intervention to improve outcome after high-risk coronary interventions <i>N. Werner, F. Burzotta, and J.-M. Sinning</i>	J1
Optimized patient selection in high-risk protected percutaneous coronary intervention <i>J. Leick, N. Werner, N. Mangner, V. Panoulas, and C. Aurigemma</i>	J4
Standardized pre-procedural clinical workup for protected percutaneous coronary intervention <i>F. Al-Rashid, N.M. Van Mieghem, L. Bonello, J. Oreglia, and E. Romagnoli</i>	J11
What is known in pre-, peri-, and post-procedural anticoagulation in micro-axial flow pump protected percutaneous coronary intervention? <i>J. Leick, O. Grottke, M. Oezkur, N. Mangner, T. Sanna, F. Al Rashid, and C. Vandenbriele</i>	J17
Defining the optimal revascularization strategy during protected high-risk procedures with Impella <i>J.-M. Sinning, F. Al-Rashid, K. Ibrahim, C. Aurigemma, and A. Chieffo</i>	J25
Handling high-risk patients in the catheterization laboratory <i>K. Ibrahim, J. Tongers, N. Mangner, N. Werner, A. Tycinska, J. Leick, J. Oreglia, and J. Schröder</i>	J30
Optimal bail-out and complication management strategies in protected high-risk percutaneous coronary intervention with the Impella <i>J.-M. Sinning, K. Ibrahim, J. Schröder, D. Sef, and F. Burzotta</i>	J37
Specific clinical vignettes in high-risk protected percutaneous coronary intervention <i>V. Panoulas, S.-T. Tan, J. Hill, and G. Tarantini</i>	J43
