Contents

ON THE COVER

Personalized Treatment: Predicting Gemcitabine Sensitivity in PDAC. See article by Fraunhofer, et al, page 476 for additional information.

IN MEMORIAM

315 In Memoriam: Walter J. Hogan, MD

R. Shaker and B. T. Massey

COMMENTARY

317 Regulatory and Clinical Expert Perspective of the 2022 FDA Draft Guidance "Celiac Disease: Developing Drugs for Adjunctive Treatment to a Gluten-Free Diet"

L. Goldkind, J. M. Soreth, and A. E. Mulberg

DIVERSITY, EQUITY, AND INCLUSION IN GI

320 Disaggregating Racial and Ethnic Data: A Step Toward Diversity, Equity, and Inclusion

P. S. Liang, S. C. Kwon, I. Cho, C. Trinh-Shevrin, and S. Yi

MENTORING, EDUCATION, AND TRAINING CORNER

325 Training Generations of Clinician Educators: Applying the Novel Clinician Educator Milestones to Faculty Development

J. K. Heath, J.-A. O. Murayi, L. Edgar, and B. J. Shah

EDITORIALS

329 Lysosomes Promote Cancer Metastasis via Exosome in *PTEN*-Deficient Tumors

Z. Zhou, M. M. Bonds, B. H. Edil, C. W. Houchen, Z. Liu, and M. Li

See Jiang T-Y et al on page 424.

332 Artificial Intelligence-Aided Colonoscopy for Characterizing and Detecting Colorectal Polyps: Required, Nice to Have, or Overhyped?

M. F. Byrne, D. Von Renteln, and A. N. Barkun

See Hassan C et al on page 467; Ladabaum U on page 481.

Publisher: *Gastroenterology* (ISSN 0016-5085) is published monthly (semi-monthly in April) in two indexed volumes by Elsevier Inc, 230 Park Avenue, New York, NY 10169-0901, USA. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: Send address changes to Elsevier, Journal Returns, 1799 Highway 50 East, Linn, MO 65051, USA. 2023 US subscription rates: individual, \$848.00; student and resident, \$323.00. Outside of the U.S. and possessions: individual, \$1026.00; student and resident, \$596.00; surface delivery, no additional charge; air mail delivery, add \$78.00. Prices subject to change without notice.

GASTRO CURBSIDE CONSULT

- 334 Three Lumens Full of Blood—An Unusual Case of Gastrointestinal Bleeding**
G. Tambakis, C. Florescu, and E. Tsoi
- 336 An Unusual Case of Refractory Peptic Ulcer Disease**
H.-j. Ma, J. Li, and M. Jin
- 338 Circumferential Gastric Wall Thickening With Lymphadenopathy**
H. Matsumoto, K. Minaga, and T. Watanabe
- 340 A Rare Cause of Liver Fibrosis in an Adolescent Woman**
R. Liu, Z. Dai, and C. Zhu

ELECTRONIC GASTRO CURBSIDE CONSULT

For a full list, please see the table of contents online at www.gastrojournal.org.

GUIDELINES

- 344 AGA Clinical Practice Guideline on the Role of Biomarkers for the Management of Ulcerative Colitis**
S. Singh, A. N. Ananthakrishnan, N. H. Nguyen, B. L. Cohen, F. S. Velayos, J. M. Weiss, S. Sultan, S. M. Siddique, J. Adler, and K. A. Chachu, on behalf of the AGA Clinical Guidelines Committee
- 373 Clinical Decision Support Tool: Role of Biomarkers for Ulcerative Colitis**
- 375 Spotlight: Role of Biomarkers for Ulcerative Colitis**
S. Singh, A. N. Ananthakrishnan, N. H. Nguyen, B. L. Cohen, F. S. Velayos, J. M. Weiss, S. Sultan, S. M. Siddique, J. Adler, and K. A. Chachu

ORIGINAL RESEARCH**Full Reports****GI Cancer**

- 376 Dysregulated Amino Acid Sensing Drives Colorectal Cancer Growth and Metabolic Reprogramming Leading to Chemoresistance**
S. Solanki, K. Sanchez, V. Ponnusamy, V. Kota, H. N. Bell, C.-S. Cho, A. H. Kowalsky, M. Green, J. H. Lee, and Y. M. Shah
- Amino acids are critical for cell growth. Cells have proteins that sense amino acid levels and dysregulation of this sensing pathway leads to rampant growth of colon cancer.
- 392 N-glycosylation Regulates Intrinsic IFN- γ Resistance in Colorectal Cancer: Implications for Immunotherapy**
J. Krug, G. Rodrian, K. Petter, H. Yang, S. Khoziainova, W. Guo, A. Bénard, S. Merkel, S. Gellert, S. Maschauer, M. Spermann, M. Waldner, P. Bailey, C. Pilarsky, A. Liebl, P. Tripal, J. Christoph, E. Naschberger, R. Croner, V. S. Schellerer, C. Becker, A. Hartmann, T. Tüting, O. Prante, R. Grützmann, S. I. Grivennikov, M. Stürzl, and N. Britzen-Laurent
- Interferon- γ -receptor protein stability and signaling are impaired in colorectal carcinoma cells through tumor-associated N-glycosylation defects, leading to acquired interferon- γ resistance and poor prognosis.

- 407** **Integrated Multi-Omics Landscape of Liver Metastases**
 S. Yang, L. Qian, Z. Li, Y. Li, J. Bai, B. Zheng, K. Chen, X. Qiu, G. Cai, S. Wang, H. Huang, J. Wu, Y. Zhu, Q. Zhangyang, L. Feng, T. Wu, R. Wu, A. Yang, K. Wang, R. Wang, Y. Zhang, Y. Zhao, W. Wang, J. Bao, S. Shen, J. Hu, X. Wu, T. Zhou, Z. Meng, W. Liu, H. Wang, P. Wang, and L. Chen

Characteristics of local immune microenvironment across various liver metastases improved clinical immune stratification for patients. Potential mechanism of vicious microenvironment and novel immunomodulatory molecular were identified using integrated multi-omics analyses.

- 424** **PTEN Deficiency Facilitates Exosome Secretion and Metastasis in Cholangiocarcinoma by Impairing TFEB-mediated Lysosome Biogenesis**
 T.-Y. Jiang, Y.-Y. Shi, X.-W. Cui, Y.-F. Pan, Y.-K. Lin, X.-F. Feng, Z.-W. Ding, C. Yang, Y.-X. Tan, L.-W. Dong, and H.-Y. Wang

See editorial on page 329.

We demonstrate that TFEB is a direct substrate of PTEN phosphatase and PTEN deficiency increases exosome secretion in cholangiocarcinoma by reducing lysosome biogenesis, which further promotes tumor metastasis.

Hepatobiliary

- 439** **Hepatocyte Kctd17 Inhibition Ameliorates Glucose Intolerance and Hepatic Steatosis Caused by Obesity-induced Chrebp Stabilization**

A.-R. Oh, Y. Jeong, J. Yu, D. T. Minh Tam, J. K. Kang, Y. H. Jung, S.-S. Im, S. B. Lee, D. Ryu, U. B. Pajvani, and K. Kim

Hepatocyte *Kctd17* expression is increased in obesity, which predisposes to insulin resistance and liver fat accumulation. Blocking excess *Kctd17* by either genetic or pharmacologic means reverses these pathologic processes, by decreasing Chrebp protein stability, a key factor that regulates both glucose and lipid metabolism.

- 454** **Identification of Reduced ERAP2 Expression and a Novel HLA Allele as Components of a Risk Score for Susceptibility to Liver Injury Due to Amoxicillin-Clavulanate**

P. Nicoletti, A. Dellinger, Y. J. Li, H. X. Barnhart, N. Chalasani, R. J. Fontana, J. A. Odin, J. Serrano, A. Stolz, A. S. Etheridge, F. Innocenti, O. Govaere, J. I. Grove, C. Stephens, G. P. Aithal, R. J. Andrade, E. S. Bjornsson, A. K. Daly, M. I. Lucena, and P. B. Watkins, on behalf of Drug-Induced Liver Injury Network (DILIN), International Drug-Induced Liver Injury Consortium (iDILIC), Prospective European Drug-Induced Liver Injury (Pro-Euro DILI) Investigators

A way to use genetic testing to help identify the rare patients susceptible to liver injury due to treatment with the antibiotic amoxicillin-clavulanate (Augmentin) is described.

RESEARCH LETTERS

- 467** **Comparative Performance of Artificial Intelligence Optical Diagnosis Systems for Leaving in Situ Colorectal Polyps**

C. Hassan, P. Sharma, Y. Mori, M. Bretthauer, D. K. Rex, Combo Study Group, and A. Repici

See editorial on page 332.

- 470** **Post-Colonoscopy Colorectal Cancer Etiologies in a Large Integrated US Health Care Setting**
 L. J. Leung, J. K. Lee, S. A. Merchant, C. D. Jensen, A. Alam, and D. A. Corley

- 473** **Race and Ethnicity, Stage-Specific Mortality, and Cancer Treatment in Esophageal and Gastric Cancers: Surveillance, Epidemiology, and End Results (2000–2018)**

O. O. Omofuma, M. B. Cook, C. C. Abnet, and M. C. Camargo

- 476** **A Transcriptomic-Based Tool to Predict Gemcitabine Sensitivity in Advanced Pancreatic Adenocarcinoma**

N. Fraunhoffer, B. Chanez, C. Teyssedou, PDAC Chemo Sensitivity Prediction Working Group, J. L. Iovanna, E. Mitry, and N. J. Duseti

481 Computer-aided Detection of Polyps Does Not Improve Colonoscopist Performance in a Pragmatic Implementation Trial*U. Ladabaum, J. Shepard, Y. Weng, M. Desai, S. J. Singer, and A. Mannalithara*

See editorial on page 332.
