ON THE COVER

Gastroenterology

Risk of Esophageal Adenocarcinoma After H pylori Eradication Treatment. See article by Wiklund, et al, page 485 for additional information.

COMMENTARIES

423 What Will Technology Do to Gastroenterology?

S. O'Mahony

426 Single-Use vs Reusable Duodenoscopes: How Infection Knowledge Gaps Are Driving Environmental Harm and What Can Be Done

M. W. Smith, L. V. Hernandez, P. Lee, R. A. Martinello, H. Singh, and J. D. Sherman

432 Severe Acute Hepatitis of Unknown Etiology in Children: New Virus or Immune Dysregulation

L. H. Gutierrez Sanchez and S. H. Ibrahim

DIVERSITY, EQUITY, AND INCLUSION IN GI

436 The Discrepant Visual Representation of Inflammatory Bowel Diseases in the Internet and Media

O. Kahn-Boesel, E. Araka, A. Anyane-Yeboah, N. N. Ufere, and B. Kochar

EDITORIALS

441 Changing Fate: How EGFRs "Pit" Cell Versus Cell in the Stomach

S. Arimura, S. To, and J. C. Mills

Cover

Publisher: *Gastroenterology* (ISSN 0016-5085) is published monthly (semi-monthly in April) in two indexed volumes by Elsevier Inc, 230 Park Avenue, New York, NY 10169-0901, USA. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: Send address changes to Elsevier, Journal Returns, 450 Fame Avenue, Hanover, PA 17331, USA. 2024 US subscription rates: individual, \$848.00; student and resident, \$323.00. Outside of the U.S. and possessions: individual, \$1026.00; student and resident, \$596.00; surface delivery, no additional charge; air mail delivery, add \$78.00. Prices subject to change without notice.

450 Abdominal Pain and Bilious Vomiting With a Dilated Duodenum and Stomach in a Five-Year-Old Boy*R. Aoyagi and M. Ogasawara***ELECTRONIC GASTRO CURBSIDE CONSULT**

For a full list, please see the table of contents online at www.gastrojournal.org.

REVIEWS IN BASIC AND CLINICAL GASTROENTEROLOGY AND HEPATOLOGY**454 Diagnosis and Management of Pancreatic Cysts***T. B. Gardner, W. G. Park, and P. J. Allen***ORIGINAL RESEARCH****Full Reports****Stomach****469 Amphiregulin Switches Progenitor Cell Fate for Lineage Commitment During Gastric Mucosal Regeneration***S.-H. Lee, Y. Won, D. Gibbs, B. Caldwell, A. Goldstein, E. Choi, and J. R. Goldenring*

See editorial on page 441.

Lineage commitment of stomach isthmus progenitor cells is regulated by different ligands for the epidermal growth factor receptor.

Helicobacter pylori**485 Risk of Esophageal Adenocarcinoma After *Helicobacter pylori* Eradication Treatment in a Population-Based Multinational Cohort Study***A.-K. Wiklund, G. Santoni, J. Yan, C. Radkiewicz, S. Xie, H. Birgisson, E. Ness-Jensen, M. von Euler-Chelpin, J. H. Kaupila, and J. Lagergren*

This study showed no increased risk of developing esophageal adenocarcinoma after eradication treatment of the common gastric bacterium *Helicobacter pylori*, which suggests such treatment is safe from a cancer perspective.

Celiac Disease**493 Biopsy Proteome Scoring to Determine Mucosal Remodeling in Celiac Disease***A. Johansen, G. K. F. Sandve, J. H. Ibsen, K. E. A. Lundin, L. M. Sollid, and J. Stamnaes*

A robust, molecular method to measure gluten-induced intestinal injury in celiac disease that will benefit development of novel treatments is described.

GI Cancer**505 Impaired Glycosylation of Gastric Mucins Drives Gastric Tumorigenesis and Serves as a Novel Therapeutic Target***J. Arai, Y. Hayakawa, H. Tateno, K. Murakami, T. Hayashi, M. Hata, Y. Matsushita, H. Kinoshita, S. Abe, K. Kurokawa, Y. Oya, M. Tsuboi, S. Ihara, R. Niikura, N. Suzuki, Y. Iwata, T. Shiokawa, C. Shiomi, C. Uekura, K. Yamamoto, H. Fujiwara, S. Kawamura, H. Nakagawa, S. Mizuno, T. Kudo, S. Takahashi, T. Ushiku, Y. Hirata, C. Fujii, J. Nakayama, S. Shibata, S. Woods, D. L. Worthley, M. Hatakeyama, T. C. Wang, and M. Fujishiro*

Golgi stress responses and aberrant glycans, induced by mucin deletion, play pivotal roles in the development of gastric cancer, highlighting promising avenues for innovative therapeutic targets.

522 Phosphatidylinositol 4-Kinase III Alpha Governs Cytoskeletal Organization for Invasiveness of Liver Cancer Cells*C. S. Tran, J. Kersten, J. Yan, M. Breinig, T. Huth, T. Poth, O. Colasanti, T. Riedl, S. Faure-Dupuy, S. Diehl, L. Verhoye, T.-F. Li, M. Lingemann, P. Schult, G. Ahlén, L. Frelin, F. Kühnel, F. W. R. Vondran, K. Breuhahn, P. Meuleman, M. Heikenwälder, P. Schirmacher, R. Bartenschlager, V. Laketa, S. Roessler, D. F. Tschaharganeh, M. Sällberg, and V. Lohmann*

Two lipid kinases orchestrate a novel signaling pathway connecting phospholipids to progression of liver cancer, unraveling promising targets for therapeutic intervention.

Functional GI Disease

538 **Thoracoabdominal Wall Motion-Guided Biofeedback Treatment of Abdominal Distention: A Randomized Placebo-Controlled Trial**

E. Barba, D. M. Livovsky, A. Accarino, and F. Azpiroz

A simple and effective biofeedback technique, guided by the motion of the abdominal and thoracic walls, is introduced to treat abdominal distention in patients with digestive disorders.

Colon

547 **Three-Dimensional Imaging of the Enteric Nervous System in Human Pediatric Colon Reveals New Features of Hirschsprung's Disease**

J. D. Eisenberg, R. P. Bradley, K. D. Graham, R. H. Ceron, A. M. Lemke, B. J. Wilkins, A. Naji, and R. O. Heuckeroth

The enteric nervous system controls most bowel functions, and when defective or missing, serious disease ensues. By making bowel translucent, the enteric nervous system becomes visible. This new strategy could improve outcomes.

Prevention and Early Detection

560 **Relative Efficacies of Interventions to Improve the Quality of Screening-Related Colonoscopy: A Systematic Review and Network Meta-Analysis of Randomized Controlled Trials**

R. Khan, Y. Ruan, Y. Yuan, K. Khalaf, N. S. Sabrie, N. Gimpaya, M. A. Scaffidi, R. Bansal, M. Vaska, D. R. Brenner, R. J. Hilsden, S. J. Heitman, G. I. Leontiadis, S. C. Grover, and N. Forbes

This review of 124 studies identified 9 interventions that endoscopists can use to improve the quality of screening colonoscopy, increasing its ability to prevent colorectal cancer for patients.

Artificial Intelligence

591 **Rapid Endoscopic Diagnosis of Benign Ulcerative Colorectal Diseases With an Artificial Intelligence Contextual Framework**

X. Luo, J. Wang, C. Tan, Q. Dou, Z. Han, Z. Wang, F. Tasnim, X. Wang, Q. Zhan, X. Li, Q. Zhou, J. Cheng, F. Liao, H. C. Yip, J. Jiang, R. T. Tan, S. Liu, and H. Yu

The study developed an artificial intelligence model that can differentiate among various ulcerative benign colorectal diseases including ulcerative colitis, Crohn's disease, ischemic colitis, and intestinal tuberculosis from colonoscopy still images and videos.

RESEARCH LETTERS

604 **Clearance of Gut Mucosal SARS-CoV-2 Antigens and Postacute COVID-19 After 2 Years in Patients With Inflammatory Bowel Disease**

A. Zollner, R. Koch, A. Jukic, A. Pfister, M. Meyer, N. Wick, G. Wick, A. Rössler, J. Kimpel, T. E. Adolph, and H. Tilg

608 **Measuring Postcolonoscopy Colorectal Cancers: Variations in Methodology to Address Indicator Timeliness and Use in High-Risk Populations**

J. Tinmouth, B. Chen, Y. Niu, K. Silveira, L. Rabeneck, and C. Dubé, on behalf of the Cancer Control and Evidence Integration PCCRC Method Working Group

611 **Real-World Stool-Based Syndecan-2 Methylation Test Improved Detection of Advanced Colorectal Neoplasia for Colorectal Cancer Screening: A Prospective, Multicenter, Community-Based Study**

S. Zhao, Z. He, X. Sui, S. Zhang, Z. Li, and Y. Bai, on behalf of the Community-Based CRC Screening Study Group

AGA SECTION

615 **Presentation of the AGA William Beaumont Prize in Gastroenterology to Hashem B. El-Serag, MD, MPH**

F. Kanwal

619 **Presentation of the 2024 AGA Distinguished Achievement Award in Basic Science to Jerrold R. Turner, MD, PhD, AGAF**

J. R. Goldenring, W. Lencer, and M. Donowitz

Access to the full content of Gastroenterology Online is available to all subscribers!

AGA members have seamless access to full Gastroenterology content from the AGA Web site. Simply sign in to <http://www.gastro.org>, visit the Publications section of the Web site, and click on Gastroenterology. You will be directed to the Journal Web site and will have full access to all content without having to supply a different username and password. Members can also visit <http://www.gastrojournal.org> directly and click on "Activate Online Access." Nonmember subscribers must create an online user account and activate their subscription to access the full text of articles on Gastroenterology Online. To activate your individual online subscription, please visit <http://www.gastrojournal.org> and click on "Activate Online Access." To activate your account, you

will need your subscriber account or member number, which you can find on your mailing label, (AGA members must use their 10-digit member number, including leading zeros). If you have any questions regarding your online subscription please call Elsevier Customer Service at (800) 654-2452.

Institutional access to Gastroenterology Online will be allowed only by limited site licensing. Further instructions will be available online. Personal subscriptions to Gastroenterology Online are for individual use only and may not be transferred. Use of Gastroenterology Online is subject to agreement to the terms and conditions of use as indicated online.
