

# Gastroenterology

Volume 164 / Issue 4 April 2023

www.gastrojournal.org

## Contents

### ON THE COVER

*The Role of Macrophages in Colitis-Associated Cancer.* See article by Livanos, et al, page 619 for additional information.

### COMMENTARY

#### 505 Mpox: What Practicing Gastroenterologists Need to Know

S. Sultan, J. Zucker, and D. S. Weinberg

### DIVERSITY, EQUITY, AND INCLUSION IN GI

#### 510 Improving the Experiences of Sexual and Gender Minority-Identifying Trainees in Gastroenterology and Hepatology

A. Goldowsky, J. Ding, C. Vélez, and S. Paul

### MENTORING, EDUCATION, AND TRAINING CORNER

#### 515 Tips and Tricks: Starting Your Own Continuing Medical Education Course

S. Hansel, V. R. Muthusamy, and U. Mahadevan

### EDITORIALS

#### 520 Early Re"cag"nition: CagA-specific CD8<sup>+</sup> T Cells Shape the Immune Response to *Helicobacter pylori*

J. B. Sáenz

See Koch MRA et al on page 550.

#### 522 Drug Treatments for Gastroparesis—Why Is the Cupboard So Bare?

E. M. M. Quigley

See Ingrosso MR et al on page 642

#### 524 Genetically Engineered Mouse Models Shine New Light on Decades-old Story of Trypsin in Pancreatitis

B. Lee, S. Z. Husain, and I. Gukovsky

See Geisz A et al on page 684.

Publisher: *Gastroenterology* (ISSN 0016-5085) is published monthly (semi-monthly in April) in two indexed volumes by Elsevier Inc, 230 Park Avenue, New York, NY 10169-0901, USA. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: Send address changes to Elsevier, Journal Returns, 1799 Highway 50 East, Linn, MO 65051, USA. 2023 US subscription rates: individual, \$848.00; student and resident, \$323.00. Outside of the U.S. and possessions: individual, \$1026.00; student and resident, \$596.00; surface delivery, no additional charge; air mail delivery, add \$78.00. Prices subject to change without notice.

**GASTRO CURBSIDE CONSULT**

- 527 A Curious Case of Severe Proctitis**  
*C. R. Lopez, T. A. Smith, and R. D. Naik*
- 529 Severe Chronic Rectocolitis Associated With a Characteristic Sunflower Magnetic Resonance Imaging Pattern**  
*A. Fraissenon, H. Desmurs-Clavel, and L. Guibaud*
- 533 An Unusual Cause of Localized Dilation of Bile Duct**  
*Y. Zhong, T. Ge, and Y. Yang*
- 537 An Unusual Cause of Acidosis in a Man With *Clostridium difficile* Colitis**  
*P. Oriot, E. Aldersons, and P.-A. Rogghe*

**ELECTRONIC GASTRO CURBSIDE CONSULT**

For a full list, please see the table of contents online at [www.gastrojournal.org](http://www.gastrojournal.org).

**GASTRO GRAND ROUNDS**

- 541 Recurrent Lower Abdominal Pain, Altered Bowel Habits, and Malaise: Conservative or Surgical Approach to a Common Disorder**  
*A. M. Morris, J. L. Fider, B. Mau, and L. L. Strate*

**ORIGINAL RESEARCH****Full Reports*****Helicobacter pylori***

- 550 CagA-specific Gastric CD8<sup>+</sup> Tissue-Resident T Cells Control *Helicobacter pylori* During the Early Infection Phase**  
*M. R. A. Koch, R. Gong, V. Friedrich, V. Engelsberger, L. Kretschmer, A. Wanisch, S. Jarosch, A. Ralser, B. Lugen, M. Quante, M. Vieth, R. Vasapolli, C. Schulz, V. R. Buchholz, D. H. Busch, R. Mejías-Luque, and M. Gerhard*

See editorial on page 520.

A unique population of oligoclonal CD8<sup>+</sup> tissue-resident T cells infiltrating the murine and human stomach upon *Helicobacter pylori* infection is identified, which specifically responds to the bacterial oncogene cytotoxin-associated gene A and mediates pathogen control.

**Celiac Disease**

- 567 Variation in Testing for and Incidence of Celiac Autoimmunity in Canada: A Population-Based Study**  
*J. A. King, J. A. Bakal, B. Li, T. A. Whitten, D. Gidrewicz, J. M. Turner, S. V. van Zanten, H. Q. Huynh, S. J. Heitman, A. A. Shaheen, H. Quan, J. Godley, F. E. Underwood, L. Hracs, D. Bergman, J. F. Ludvigsson, B. Lebwohl, E. I. Benchimol, T. Williamson, and G. G. Kaplan*

Despite stable testing for celiac disease, the rate of new cases based on positive serology has increased in Alberta. Notable differences in testing and case identification are present across various patient populations.

**GI Cancer**

- 579 Constitutional Microsatellite Instability, Genotype, and Phenotype Correlations in Constitutional Mismatch Repair Deficiency**  
*R. Gallon, R. Phelps, C. Hayes, L. Brugieres, L. Guerrini-Rousseau, C. Colas, M. Muleris, N. A. J. Ryan, D. G. Evans, H. Grice, E. Jessop, A. Kunzemann-Martinez, L. Marshall, E. Schamschula, K. Oberhuber, A. A. Azizi, H. Baris Feldman, A. Beilken, N. Brauer, T. Brozou, K. Dahan, U. Demirsoy, B. Florkin, W. Foulkes, D. Januszkelewicz-Lewandowska, K. J. Jones, C. P. Kratz, S. Lobitz, J. Meade, M. Nathrath, H.-J. Pander, C. Perne, I. Ragab, T. Ripperger, T. Rosenbaum, D. Rueda, T. Sarosiek, A. Sehested, I. Spier, M. Suerink, S.-Y. Zimmermann, J. Zschocke, G. M. Borthwick, K. Wimmer, J. Burn, M. S. Jackson, and M. Santibanez-Koref*

We develop an accurate blood test for a childhood cancer syndrome. The test result is influenced by what genetic change is in each patient, but does not predict cancer risk.

- 593 F4/80<sup>+</sup>Ly6C<sup>high</sup> Macrophages Lead to Cell Plasticity and Cancer Initiation in Colitis**  
 *A. E. Shin, Y. Tesfagiorgis, F. Larsen, M. Derouet, P. Y. F. Zeng, H. J. Good, L. Zhang, M. R. Rubinstein, Y. W. Han, S. M. Kerfoot, A. C. Nichols, Y. Hayakawa, C. J. Howlett, T. C. Wang, and S. Asfaha*

This study investigates the mechanism by which inflammation leads to cancer. Our findings demonstrated that a subset of macrophages is critical for the initiation of colitis-associated cancer.

## Inflammatory Bowel Disease

- 610 Development and Validation of the TUMMY-UC: A Patient-Reported Outcome for Pediatric Ulcerative Colitis**  
 *L. Marcovitch, G. Focht, N. Carmon, C. Tersigni, O. Ledder, R. Lev-Tzion, P. C. Church, J. S. Hyams, R. N. Baldassano, A. Bousvaros, D. R. Mack, S. Hussey, A. Otley, N. M. Croft, M. D. Kappelman, A. M. Griffiths, and D. Turner*

In a multistage process, we developed the TUMMY-UC, a patient-reported outcome measure for pediatric ulcerative colitis, which is a reliable, valid, and responsive index. An observer-reported version was developed for children aged <8 years.

- 619 Anti-Integrin  $\alpha v \beta 6$  Autoantibodies Are a Novel Biomarker That Antedate Ulcerative Colitis**  
 *A. E. Livanos, A. Dunn, J. Fischer, R. C. Ungaro, W. Turpin, S.-H. Lee, S. Rui, D. M. Del Valle, J. J. Jougon, G. Martinez-Delgado, M. S. Riddle, J. A. Murray, R. M. Laird, J. Torres, M. Agrawal, J. S. Magee, T. Dervieux, S. Gnjatic, D. Sheppard, B. E. Sands, C. K. Porter, K. Croitoru, F. Petralia, CCC-GEM Project Research Consortium, OSCCAR Consortium, J.-F. Colombel, and S. Mehandru*

Anti-integrin  $\alpha v \beta 6$  autoantibodies are a new biomarker for the development of ulcerative colitis and disease-related adverse outcomes.

## Functional GI Disease

- 630 Catechol-O-Methyltransferase Loss Drives Cell-Specific Nociceptive Signaling via the Enteric Catechol-O-Methyltransferase/microRNA-155/Tumor Necrosis Factor  $\alpha$  Axis**  
 *Q. Zhou, L. Yang, M. L. Verne, B. B. Zhang, J. Fields, and G. N. Verne*

We identified molecules in colon tissues of irritable bowel syndrome patients that lead to abdominal pain. These molecules induced visceral pain in mice that was reversed with blocking agents.

- 642 Efficacy and Safety of Drugs for Gastroparesis: Systematic Review and Network Meta-analysis**  
 *M. R. Ingrosso, M. Camilleri, J. Tack, G. Ianiro, C. J. Black, and A. C. Ford*

See editorial on page 522.

We studied efficacy of drugs for gastroparesis. Most drugs were not efficacious; only clevopride and domperidone were better than a placebo. There is a great unmet need for drugs that improve the symptoms for people with this condition.

- 655 Negative Impact of Disorders of Gut-Brain Interaction on Health-Related Quality of Life: Results From the Rome Foundation Global Epidemiology Survey**  
 *S. R. Knowles, D. Skvarc, A. C. Ford, O. S. Palsson, S. I. Bangdiwala, A. D. Sperber, and A. Mikocka-Walus*

Quality of life is poorer for individuals with disorders of gut-brain interaction, especially if they are women, aged older than 65 years, have overlapping disorders of gut-brain interaction, and experience mental health symptoms.

## Hepatobiliary

- 669 Low Hepatitis B Core-Related Antigen Levels Correlate Higher Spontaneous Seroclearance of Hepatitis B Surface Antigen in Chronic Hepatitis B Patients With High Hepatitis B Surface Antigen Levels**  
 *T.-C. Tseng, C. Chiang, C.-J. Liu, C.-M. Hong, T.-H. Su, H.-C. Yang, W.-T. Yang, C.-H. Liu, P.-J. Chen, and J.-H. Kao*

In a large retrospective cohort study of patients with chronic hepatitis B, we found lower levels of hepatitis B core-related antigen were associated with higher probability of clearing hepatitis B surface antigen. Reduction of hepatitis B core-related antigen developed 10 years before decline of hepatitis B surface antigen in patients with high hepatitis B surface antigen levels at baseline, but cleared hepatitis B surface antigen thereafter. This different kinetic of viral antigens may blueprint the treatment strategy for hepatitis B virus cure.

**RESEARCH LETTERS**

- 680** High Discovery Rate of Duodenal and Gastric Eosinophilia in Patients With Unexplained Moderate–Severe Abdominal Symptoms: A Prospective US Multisite Study  
*N. J. Talley, K. A. Peterson, R. M. Genta, A. T. Chang, E. S. Dellon, W. J. Sandborn, and The 019 Study Team*

- 684** Trypsin Activity in Secretagogue-induced Murine Pancreatitis Is Solely Elicited by Cathepsin B and Does Not Mediate Key Pathologic Responses  
*A. Geisz, T. Tran, A. Orekhova, and M. Sahin-Tóth*  
See editorial on page 524.
