Contents

ON THE COVER

Sole Origin of the Enteric Nervous System. See article by Yu, Liu, and Du, et al, page 1085 for additional information.

COMMENTARIES

- 949 Commentary on the Epidemiology of Inflammatory Bowel Disease in Compounding Prevalence Nations: Toward Sustaining Healthcare Delivery**
M. Herauf, S. Coward, J.-N. Peña-Sánchez, C. N. Bernstein, E. I. Benchimol, G. G. Kaplan, and Canadian Gastro-Intestinal Epidemiology Consortium
- 957 Diagnostic and Prognostic Biomarkers of Chronic Pancreatitis: A Conceptual Framework Based on the PROBE Design**
D. Yadav, D. L. Conwell, S. J. Pandol, H. Steen, Z. Feng, L. Li, and Consortium for the Study of Chronic Pancreatitis, Diabetes, and Pancreatic Cancer

EDITORIALS

- 963 Endoscopic Surveillance After Endoscopic Eradication Therapy for Barrett's Esophagus With Neoplasia: Is the Vial Half Empty or Half Full?**
T. Sawas, S. Wani, and D. A. Katzka
See Van Munster SN et al on page 1058.
- 965 Longitudinal Change of Alcohol Use is a Dynamic Contributor to Steatotic Liver Disease Progression**
B. P. Lee and A. Louvet
See Wong RJ et al on page 1156.

GASTRO CURBSIDE CONSULT

- 968 A Case of Mistaken Identity**
T. A. Karl, M. Knight, and E. Mun
- 972 An Unusual Cause of Ascites in a Patient With Hepatitis B**
L. Lai, C. Rao, and H. Liu

COV Cover

Publisher: *Gastroenterology* (ISSN 0016-5085) is published monthly (semi-monthly in April) in two indexed volumes by Elsevier Inc, 230 Park Avenue, New York, NY 10169-0901, USA. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: Send address changes to Elsevier, Journal Returns, 450 Fame Avenue, Hanover, PA 17331, USA. 2024 US subscription rates: individual, \$848.00; student and resident, \$323.00. Outside of the U.S. and possessions: individual, \$1026.00; student and resident, \$596.00; surface delivery, no additional charge; air mail delivery, add \$78.00. Prices subject to change without notice.

ELECTRONIC GASTRO CURBSIDE CONSULT

For a full list, please see the table of contents online at www.gastrojournal.org.

REVIEWS IN BASIC AND CLINICAL GASTROENTEROLOGY AND HEPATOLOGY

- 976 Chronic Visceral Pain: New Peripheral Mechanistic Insights and Resulting Treatments**
A. C. Ford, S. Vanner, P. C. Kashyap, and Y. Nasser

- 995 Immunopathogenesis of Primary Biliary Cholangitis, Primary Sclerosing Cholangitis and Autoimmune Hepatitis: Themes and Concepts**
P. J. Trivedi, G. M. Hirschfield, D. H. Adams, and J. M. Vierling

GUIDELINES

- 1020 AGA Clinical Practice Guideline on Endoscopic Eradication Therapy of Barrett's Esophagus and Related Neoplasia**
J. H. Rubenstein, T. Sawas, S. Wani, S. Eluri, S. Singh, A. K. Chandar, R. B. Perumpail, J. M. Inadomi, A. P. Thrift, A. Piscoya, S. Sultan, S. Singh, D. Katzka, and P. Davitkov

- 1056 Clinical Decision Support Tool: Endoscopic Eradication Therapy of Barrett's Esophagus and Related Neoplasia**

- 1057 Spotlight: Endoscopic Eradication Therapy (EET) of Barrett's Esophagus and Related Neoplasia**
J. H. Rubenstein, T. Sawas, S. Wani, S. Eluri, S. Singh, A. K. Chandar, R. B. Perumpail, J. M. Inadomi, A. P. Thrift, A. Piscoya, S. Sultan, S. Singh, D. Katzka, and P. Davitkov

ORIGINAL RESEARCH

Full Reports

Esophagus

- 1058 Incidence and Prediction of Unrelated Mortality After Successful Endoscopic Eradication Therapy for Barrett's Neoplasia**
Sanne. N. van Munster, E. P. D. Verheij, Ö. Ozdemir, E. Toes-Zoutendijk, I. Lansdorp-Vogelaar, E. A. Nieuwenhuis, C. C. Cotton, B. L. A. M. Weusten, L. Alvarez Herrero, A. Alkhalaf, B. E. Schenk, E. J. Schoon, W. L. Curvers, A. D. Koch, P.-J. F. de Jonge, T. J. Tang, W. B. Nagengast, J. Westerhof, M. H. M. G. Houben, N. J. Shaheen, J. J. G. H. M. Bergman, and R. E. Pouw

See editorial on page 963.

After treatment for Barrett's neoplasia, the risk of dying from other causes than esophageal cancer is 40 times higher and predictable. This risk should therefore be considered in guidelines on follow-up after treatment.

GI Cancer

- 1069 Tertiary Lymphoid Structure-Associated B Cells Enhance CXCL13⁺CD103⁺CD8⁺ Tissue-Resident Memory T-Cell Response to Programmed Cell Death Protein 1 Blockade in Cancer Immunotherapy**
C. Hu, W. You, D. Kong, Y. Huang, J. Lu, M. Zhao, Y. Jin, R. Peng, D. Hua, D.-M. Kuang, and Y. Chen

This study sheds light on the cross talk between B cells and CXCL13⁺CD103⁺CD8⁺ tissue-resident memory T cells in promoting cancer immunotherapy by revealing a specific cellular communication through the lymphotoxin- α /tumor necrosis factor receptor type 2 axis within the tertiary lymphoid structures.

Functional GI Disease

- 1085 Sacral Neural Crest-Independent Origin of the Enteric Nervous System in Mouse**
Q. Yu, L. Liu, M. Du, D. Müller, Y. Gu, Z. Gao, X. Xin, Y. Gu, M. He, T. Marquardt, and L. Wang

The enteric nervous system, the gut's "brain," originates from a single source of progenitor cells instead of 2, as previously believed, which greatly simplifies understanding developmental enteric nervous system disorders.

Pancreas

1100 Novel Approach for Pancreas Transcriptomics Reveals the Cellular Landscape in Homeostasis and Acute Pancreatitis

K. J. Aney, W.-J. Jeong, A. F. Vallejo, C. Burdziak, E. Chen, A. Wang, P. Koak, K. Wise, K. Jensen, D. Pe'er, S. K. Dougan, L. Martelotto, and S. Nissim

Digestive enzymes impede single-cell profiling of exocrine pancreas. FixNCut uses reversible fixation to overcome this challenge, allowing us to define cell heterogeneity and dynamic cell states during pancreatitis and establish an acinar-to-ductal metaplasia index.

1114 Intratumoral Cell Neighborhoods Coordinate Outcomes in Pancreatic Ductal Adenocarcinoma

M. M. Wattenberg, S. Colby, I. Garrido-Laguna, Y. Xue, R. Chang, D. Delman, J. Lee, K. Affolter, S. J. Mulvihill, M. S. Beg, A. Wang-Gillam, J. L. Wade III, K. A. Guthrie, E. G. Chiorean, S. A. Ahmad, A. M. Lowy, P. A. Philip, D. P. S. Sohal, and G. L. Beatty

Using standard multiplex immunohistochemistry paired with computational image analysis, cell communities in untreated and chemotherapy-treated pancreatic cancer were identified as important determinants of survival.

Hepatobiliary

1130 Dual Inhibition of CDK4/6 and XPO1 Induces Senescence With Acquired Vulnerability to CRBN-Based PROTAC Drugs

H. Wang, S. Yuan, Q. Zheng, S. Zhang, Q. Zhang, S. Ji, W. Wang, Y. Cao, Y. Guo, X. Yang, H. Geng, F. Yang, S. Xi, G. Jin, J. Zhang, Q. Gao, R. Bernards, W. Qin, and C. Wang

Our study demonstrates that simultaneous inhibition of CDK4/6 and XPO1 induces senescence in liver cancer cells, making them susceptible to CRBN-based PROTAC drugs.

1145 Endoscopic Gallbladder Stenting to Prevent Recurrent Cholecystitis in Deferred Cholecystectomy: A Randomized Trial

W. Ridditid, J. Karuehardsuwan, N. Faknak, P. Piyachaturawat, P. Vongwattanakit, S. Kulpatcharapong, P. Angsuwatcharakon, P. Mekaroonkamol, P. Kongkam, and R. Rerknimitr

Endoscopic transpapillary gallbladder stenting is a useful temporary treatment before definitive cholecystectomy in patients with mild to moderate acute cholecystitis with deferred surgery for 3 months.

1156 Impact of Longitudinal Alcohol Use Patterns on Long-Term Risk of Cirrhosis Among US Veterans With Steatotic Liver Disease

R. J. Wong, Z. Yang, R. Cheung, A. K. Singal, A. Do, A. Ahmed, and A. Yeoh

See editorial on page 965.

High-risk alcohol use in adults with steatotic liver disease increases the risk of liver disease progression. Timely alcohol use assessment and early interventions to address high-risk alcohol use are critical, particularly in patients with steatotic liver disease.

RESEARCH LETTERS

1166 In Human Esophageal Epithelial and Muscle Cells Treated With Th2 Cytokines, Upadacitinib Decreases Eotaxin-3 Secretion and Muscle Tension

M. Nelson, X. Zhang, E. Podgaetz, A. Melmed, S. J. Spechler, and R. F. Souza

1170 Prevalence of Sessile Serrated Lesions in Individuals With Positive Fecal Immunochemical Test Undergoing Colonoscopy: Results From a Large Nationwide Veterans Affairs Database

N. Wilson, M. Bilal, A. Westanmo, A. Gravely, and A. Shaikat

AGA SECTION

1174 Presentation of the Julius M. Friedenwald Medal to M. Bishr Omary

Access to the full content of Gastroenterology Online is available to all subscribers!

AGA members have seamless access to full Gastroenterology content from the AGA Web site. Simply sign in to <http://www.gastro.org>, visit the Publications section of the Web site, and click on Gastroenterology. You will be directed to the Journal Web site and will have full access to all content without having to supply a different username and password. Members can also visit <http://www.gastrojournal.org> directly and click on "Activate Online Access." Nonmember subscribers must create an online user account and activate their subscription to access the full text of articles on Gastroenterology Online. To activate your individual online subscription, please visit <http://www.gastrojournal.org> and click on "Activate Online Access." To activate your account, you

will need your subscriber account or member number, which you can find on your mailing label, (AGA members must use their 10-digit member number, including leading zeros). If you have any questions regarding your online subscription please call Elsevier Customer Service at (800) 654-2452.

Institutional access to Gastroenterology Online will be allowed only by limited site licensing. Further instructions will be available online. Personal subscriptions to Gastroenterology Online are for individual use only and may not be transferred. Use of Gastroenterology Online is subject to agreement to the terms and conditions of use as indicated online.
