ORIGINAL INVESTIGATION

376 Four-Year Visual Outcomes in the Protocol W Randomized Trial of Intravitreal Aflibercept for Prevention of Vision-Threatening Complications of Diabetic RetinopathyRK Maturi and Coauthors
for the DRCR Retina Network

This randomized clinical trial analyzes the effects of aflibercept injections vs sham for reducing disease progression and improving long-term visual acuity in patients with nonproliferative diabetic retinopathy.

Visual Abstract

386 Association Between Drug Characteristics and Manufacturer Spending on Direct-to-Consumer Advertising

MJ DiStefano and Coauthors

This pharmaco-economic study estimates associations between drug characteristics and the proportion of manufacturer promotional spending allocated to direct-to-consumer advertising.

Editorial 371

393 Association Between History of Adverse Pregnancy Outcomes and Coronary Artery Disease Assessed by Coronary Computed Tomography Angiography

S Sederholm Lawesson and Coauthors

This study assesses the association of history of adverse pregnancy outcomes with subsequent image-identified coronary artery disease among a population-based cohort of women in Sweden.
