

*Invited Commentary*

**CUL4B: a novel epigenetic driver in Wnt/ $\beta$ -catenin-dependent hepatocarcinogenesis:** MTS Mok and ASL Cheng ..... 1

*Original Papers*

**Under-expression of  $\alpha 8$  integrin aggravates experimental atherosclerosis:** C Menendez-Castro, N Cordasic, D Neureiter, K Amann, I Marek, G Volkert, S Stintzing, A Jahn, W Rascher, KF Hilgers and A Hartner ..... 5

**UV exposure modulates hemidesmosome plasticity, contributing to long-term pigmentation in human skin:** SG Coelho, JC Valencia, L Yin, C Smuda, A Mahns, L Kolbe, SA Miller, JZ Beer, G Zhang, PL Tuma and VJ Hearing ..... 17

**Loss of PTEN promotes podocyte cytoskeletal rearrangement, aggravating diabetic nephropathy:** JS Lin, Y Shi, H Peng, X Shen, S Thomas, Y Wang, LD Truong, SE Dryer, Z Hu and J Xu ... 30

**Cell- and developmental stage-specific *Dicer1* ablation in the lung epithelium models cystic pleuropulmonary blastoma:** PK Wagh, MA Gardner, X Ma, M Callahan, JM Shannon, SE Wert, YH Messinger, LP Dehner, DA Hill and KA Wikenheiser-Brokamp ..... 41

**Catenin- $\delta 1$ , negatively regulated by miR-145, promotes tumour aggressiveness in gastric cancer:** A-Y Xing, Y-W Wang, Z-X Su, D-B Shi, B Wang and P Gao ..... 53

**Erbin interacts with c-Cbl and promotes tumorigenesis and tumour growth in colorectal cancer by preventing c-Cbl-mediated ubiquitination and down-regulation of EGFR:** S Yao, P Zheng, H Wu, L-M Song, X-F Ying, C Xing, Y Li, Z-Q Xiao, X-N Zhou, T Shen, L Chen, Y-H Liu, M-D Lai, L Mei, T-M Gao and J-M Li ..... 65

**The genomic landscape of pheochromocytoma:** A Flynn, D Benn, R Clifton-Bligh, B Robinson, AH Trainer, P James, A Hogg, K Waldeck, J George, J Li, SB Fox, AJ Gill, G McArthur, RJ Hicks and RW Tothill ..... 78

**DMP1 $\beta$ , a splice isoform of the tumour suppressor *DMP1* locus, induces proliferation and progression of breast cancer:** D Maglic, DB Stovall, JM Cline, EA Fry, A Mallakin, P Taneja, DL Caudell, MC Willingham, G Sui and K Inoue ..... 90

**Orphan nuclear receptor TLX functions as a potent suppressor of oncogene-induced senescence in prostate cancer via its transcriptional co-regulation of the *CDKN1A* (*p21<sup>WAF1/CIP1</sup>*) and *SIRT1* genes:** D Wu, S Yu, L Jia, C Zou, Z Xu, L Xiao, K-B Wong, C-F Ng and FL Chan ..... 103

**Astrocytes facilitate melanoma brain metastasis via secretion of IL-23:** A Klein, H Schwartz, O Sagi-Assif, T Meshel, S Izraely, S Ben Menachem, R Bengaiev, A Ben-Shmuel, C Nahmias, P-O Couraud, IP Witz and N Erez ..... 116

*Letters to the Editor*

**Re: Shi et al. Protease-activated receptor 2 suppresses lymphangiogenesis and subsequent lymph node metastasis in a murine pancreatic cancer model. *J Pathol* 2014;234: 398-409:** Z Rohan, T Olejar and R Matej ..... 128

**Authors' reply—Re: Shi et al. Protease-activated receptor 2 suppresses lymphangiogenesis and subsequent lymph node metastasis in a murine pancreatic cancer model. *J Pathol* 2014;234: 398–409:** K Shi and CA Spek ..... 130

**Corrigendum** ..... 131
