#### **Editorials**

- 855 Gender Differences in Medicine—From Medical School to Medicare

  Donald A. Barr
- 858 Can Changes in Guidelines on the Use of Antibiotic Prophylaxis Before Invasive Dental Procedures Tell Us Whether Antibiotic Prophylaxis Is Effective in Preventing Infective Endocarditis?

  Martin H. Thombill
- An Editor's Walk With Mayo Clinic Proceedings, 1999-2017: Promises, Aspirations, and Reflections

  William L. Lanier

## **Original Articles**

- Gender Differences in Physician Service Provision Using Medicare Claims Data

  Michael A. Mahr, Sharonne N. Hayes, Tait D. Shanafelt, Jeff A. Sloan, and Jay C. Erie

  These findings suggest, but do not prove, that Medicare payments to female physicians are lower because of different practice patterns.
- Effect of the American Heart Association 2007 Guidelines on the Practice of Dental Prophylaxis for the Prevention of Infective Endocarditis in Olmsted County, Minnesota

  Daniel C. DeSimone, Abdelghani El Rafei, Douglas W. Challener, Alan B. Carr, James A. Kelly, Walter A. Rocca, Jennifer L. St Sauver, Cynthia M. Bock-Goodner, Brian D. Lahr, James M. Steckelberg, Walter R. Wilson, and Larry M. Baddour

There was a significant reduction in the use of antibiotic prophylaxis not only in patients at moderate risk, but also—unexpectedly—in patients at high risk.

A Population-Based Study in Olmsted County, Minnesota, 2000 to 2010

John G. Muzic, Adam R. Schmitt, Adam C. Wright, Dema T. Alniemi, Adeel S. Zubair,

Jeannette M. Olazagasti Lourido, Ivette M. Sosa Seda, Amy L. Weaver, and Christian L. Baum

The increased incidence of cutaneous squamous cell carcinoma was disproportionately higher than that of basal cell carcinoma, and women had the greatest increase in incidence rates of both.

899 Differences Between Alcoholic and Nonalcoholic Patients With Wernicke Encephalopathy: A Multicenter Observational Study

Antonio J. Chamorro, Beatriz Rosón-Hernández, José-A. Medina-García, Roberto Muga-Bustamante, Joaquín Fernández-Solá, M.-Candelaria Martín-González, Elena Seco-Hernández, Ignacio Novo-Veleiro, Carlos Suárez-Cuervo, Ana M. Mateos-Díaz, Rafael Monte-Secades, Begoña Machado-Prieto, Rubén Puerta-Louro, Cristina Prada-González, Álvaro Fernández-Rial, Patricia Sabio-Repiso, Rocío Vázquez-Vigo, Ana-C. Antolí-Royo, Aina Gomila-Grange, Nieves-C. Felipe-Pérez, Arantza Sanvisens-Bergé, Emilia Antúnez-Jorge, Camino-M. Fernández-Rodríguez, Lucía Alvela-Suárez, Alba Fidalgo-Navarro, and Miguel Marcos; on behalf of the Wernicke-SEMI Group, Alcohol and Alcoholism Group, Spanish Society of Internal Medicine (SEMI)

In alcoholic patients, altered mental state or mild memory impairment, followed by cerebellar dysfunction, were the most common signs. In nonalcoholic patients, ocular signs were the most frequent finding.

908 Presentation and Outcomes of Localized Immunoglobulin Light Chain Amyloidosis: The Mayo Clinic Experience

Taxiarchis V. Kourelis, Robert A. Kyle, David Dingli, Francis K. Buadi, Shaji K. Kumar, Morie A. Gertz, Martha Q. Lacy, Prashant Kapoor, Ronald S. Go, Wilson I. Gonsalves, Rahma Warsame, John A. Lust, Suzanne R. Hayman, S. Vincent Rajkumar, Steven R. Zeldenrust, Stephen J. Russell, Yi Lin, Nelson Leung, and Angela Dispenzieri

Localized immunoglobulin light chain amyloidosis is rare but can cause substantial morbidity and, in rare cases, mortality. Recurrence after first-line therapy is common, but long-term outcomes are excellent.

Cardiorespiratory Fitness and All-Cause Mortality in Men With Emotional Distress

Xuemei Sui, John Ott Jr, Katie Becofsky, Carl J. Lavie, Linda Emstsen, Jiajia Zhang, and Steven N. Blair

Health care professionals should focus on improving cardiorespiratory fitness among men with emotional distress, not only to potentially reduce the distress, but also to reduce all-cause mortality risk.

Associations Between Anthropometric Measurements and Cardiometabolic Risk Factors in White European and South Asian Adults in the United Kingdom

Farah F. Kidy, Nafeesa Dhalwani, Deirdre M. Harrington, Laura J. Gray, Danielle H. Bodicoat, David Webb, Melanie J. Davies, and Karnlesh Khunti

Measures of body mass index, waist circumference, waist-to-hip ratio, and waist-to-height ratio had similarly low, but different, associations with cardiometabolic risk factors.

# **Brief Report**

Prognostic Value of Geriatric Conditions Beyond Age After Acute Coronary Syndrome

Juan Sanchis, Vicente Ruiz, Clara Bonanad, Ernesto Valero, Maria Arantzazu Ruescas-Nicolau, Yasmin Ezzatvar,

Clara Sastre, Sergio García-Blas, Anna Mollar, Vicente Bertomeu-González, Gerna Miñana,

and Julio Núñez

# Special Article

940 The Organ Transplant Imperative
Wil L. Santívasi, Jacob J. Strand, Paul S. Mueller, and Thomas J. Beckman
