

➔ Cover Image

Significant clusters of the positive correlation between regional β -amyloid deposition and the apathy rating scores are depicted. The most prominent findings localized to the bilateral frontal and cingulate cortices and nuclei accumbens regions. Stylized by Kaitlyn Aman Ramm, *Neurology* Editorial Assistant.

In the Next Issue of *Neurology*[®]

Neurology.org/N Offers Important Information to Patients and Their Families

The *Neurology*[®] Patient Page provides:

- A critical review of ground-breaking discoveries in neurologic research that are written especially for patients and their families
- Up-to-date patient information about many neurologic diseases
- Links to additional information resources for neurologic patients

All *Neurology* Patient Page articles can be easily downloaded and printed, and may be reproduced to distribute for educational purposes. Click on the 'Patients' link on the home page (Neurology.org/N) for a complete index of Patient Pages.
